# What is ezeelogin?

119 admin January 3, 2023   4669

Ezeelogin is a secure **SSH Jump server** software that helps you configure your own custom Linux-based ***ssh jump*** **server**. It is an *SSH Jump Server software* to secure ssh access of your employees to Linux servers/ devices, Routers, Switches, and Cloud instances. Ezeelogin SSH Jump Server helps to meet various security compliances such as PCI DSS, ISO 27001, HIPAA, NIST, FedRamp, SOC, SOX, and much more. It has features like 2-factor authentication, SAML Authentication, SSH session recording, Identity and Access Management (IAM), RBAC, Privileged Access Management (PAM), SSH key rotation, root password management, etc.
