SSH Jumpbox behind firewall

13   admin   June 8, 2024   [Getting Started](#)   6391

Can an SSH jumpbox be installed behind a firewall? What will be the IP address when the SSH gateway is installed in the LAN?

Yes, SSH jumphost can be behind a firewall and would work within a LAN.

Run the command on the SSH gateway server, and it will display the IP address for which the license needs to be issued if your SSH gateway is behind a NAT.
