

fatal: no matching mac found: unable to ssh due to strict cipher set for pci dss compliance on remote box

138 admin September 1, 2017 [Common Errors & Troubleshooting](#) 10409

Q] Unable to remote servers which have strict ciphers enabled. On the target server's side we see the error: "fatal: no matching mac found: client hmac-sha1,hmac-sha1-96,hmac-md5,hmac-md5-96,hmac-ripemd160,hmac-ripemd160@openssh.com server hmac-sha2-512,hmac-sha2-256".

Q] The following ciphers are enabled on my remote box and unable to ssh from ezeelogin ssh jumpbox

KexAlgorithms diffie-hellman-group-exchange-sha256

MACs hmac-sha2-512,hmac-sha2-256

Ciphers aes256-ctr,aes192-ctr,aes128-ctr

It's for PCI compliance

A] Upgrade to ezeelogin version 7.2.6 and above.
