

How to copy files from desktop to Gateway servers using WinSCP

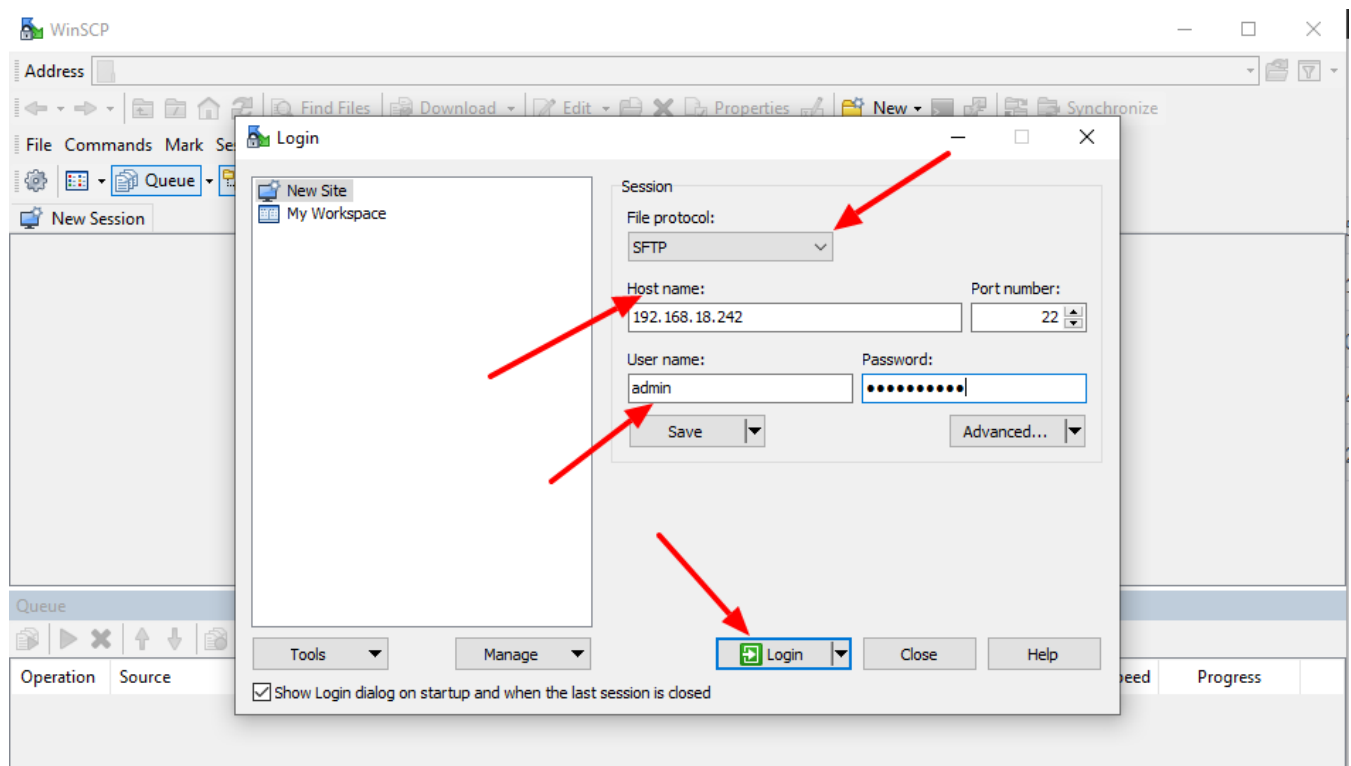

151 admin May 1, 2021 [Technical](#) 58393

Copy/Transfer files from my local desktop to Ezeelogin Gateway

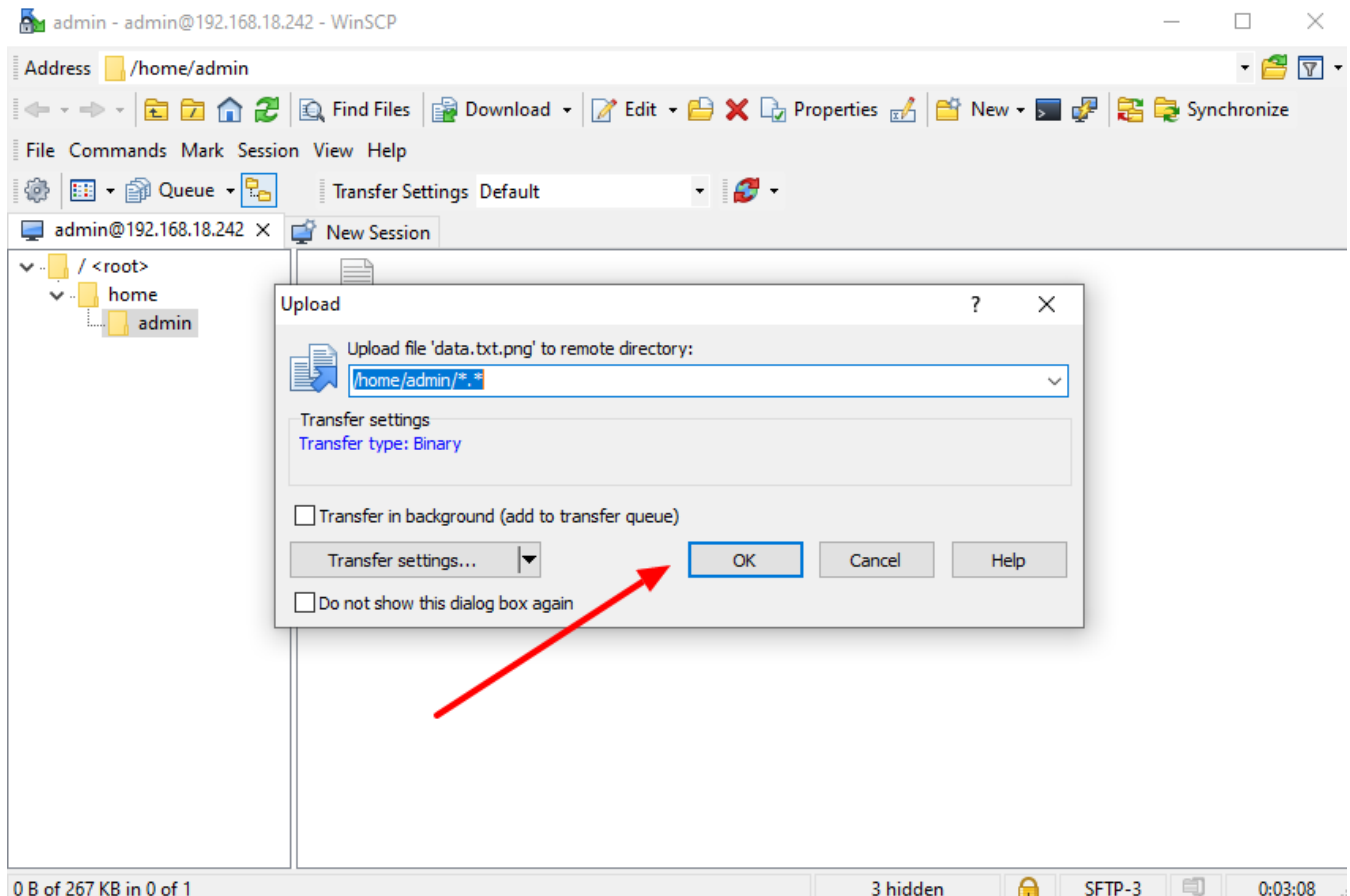

You can use 'WinSCP' or 'FileZilla' Application or 'sftp' or scp command to transfer files from your desktop or local machines to the remote ssh jump server. Once the file is on the ssh jump server, you can use the [Secure Copy or Parallel Copy feature](#) to transfer the file to other remote servers behind the ssh jump host.

Copy/transfer files from my local desktop to Ezeelogin gateway using [WINSCP](#) Software?

1. Open WinSCP and Select SFTP File protocol, provide the Hostname, username, password, and Port number of the Ezeelogin gateway server in the respective fields as shown below. Click on the Login button to connect to the Ezeelogin gateway server.

2.Right-click on the file and click on the **Upload** button to transfer the file to the Ezeelogin gateway server as shown below. Also, you can drag and drop the file to the gateway user's folder.

Note: If you use **SCP** protocol to transfer the file from your Desktop to the Ezeelogin gateway it won't work, and will get the following error.

Copy/transfer files from my local desktop to Ezeelogin gateway using [FILEZILLA](#) Software?

1. Open FileZilla application and provide the Hostname, username, password, and Port number of the Ezeelogin gateway server in the respective fields as shown below. Click on the Quickconnect button to connect to the Ezeelogin gateway server.

2.Right-click on the file and click on the **Upload** button to transfer the file to the Ezeelogin gateway server as shown below. Also, you can drag and drop the file to the gateway user's folder.

Copy/transfer files from my local desktop to Ezeelogin gateway using SCP or SFTP commands

Authenticate using the ssh gateway user name for scp or sftp to upload the file into the home directory of the ssh gateway user.

```
your-ssh-gateway-user@gateway-server-host:~/
```

The below command would transfer the file 'test' from the desktop to the ssh gateway

To use sftp
