

How to stream the ssh sessions in real time?

157 admin February 27, 2023 [Productivity & Efficiency Features](#), [Security Features](#), [Technical](#) 12435

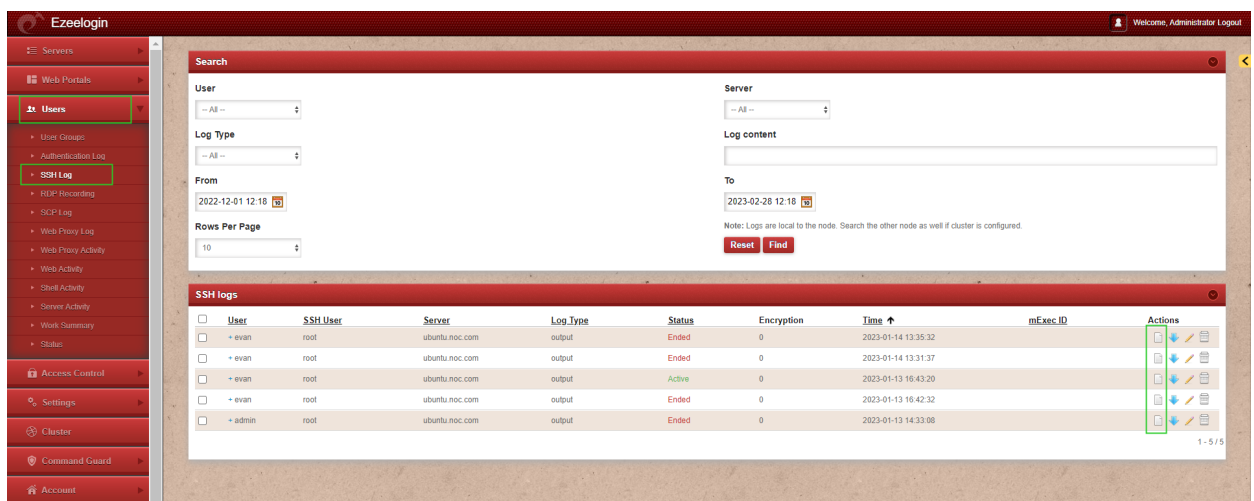

Stream SSH in real-time

In order to stream the ssh session of users in real time, click on SSH Log Note that ssh live streaming is possible only for ongoing ssh sessions only and not for sessions that have ended.

SSH Live streaming is possible only for ongoing ssh sessions.

SSH Live streaming is possible only if 'SSH Log Encryption' is disabled.

1. Click on the *SSH Log tab*. If the tab is not visible then ensure that the user has the privileges to view the SSH Log-in Access Control

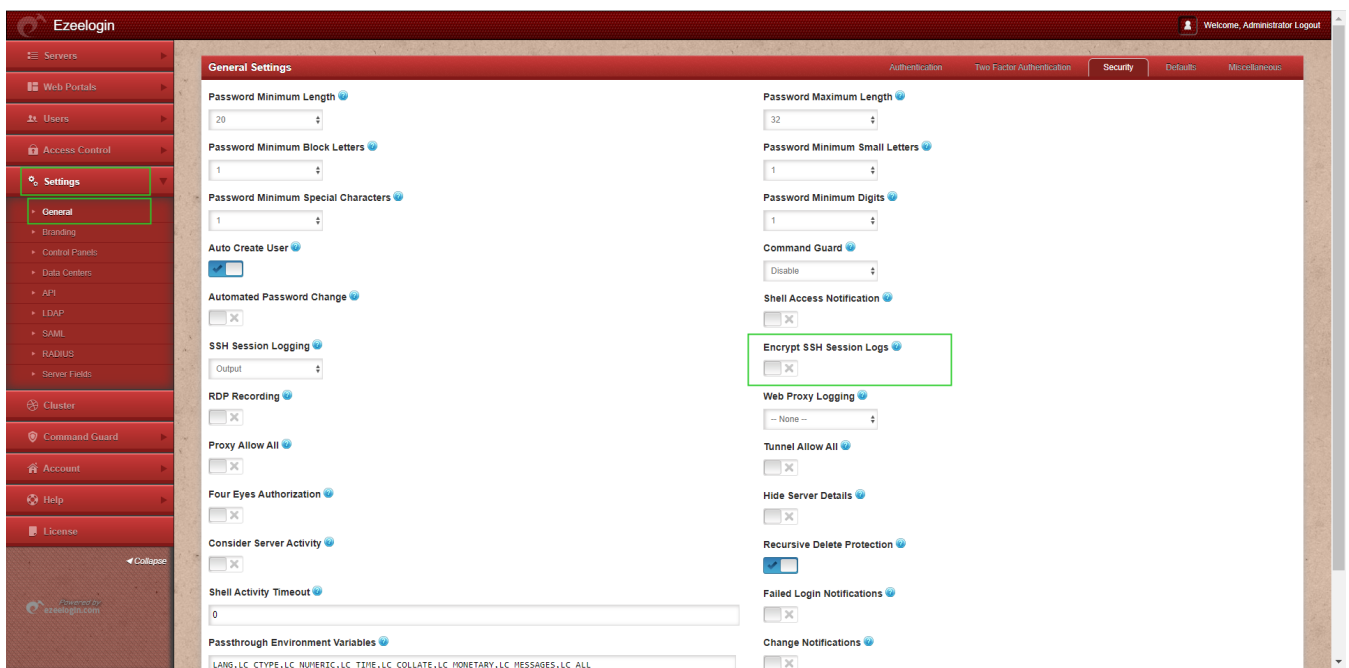

The screenshot shows the Ezeelogin web interface. On the left is a navigation menu with 'Users' and 'SSH Log' highlighted. The main area has a search filter with fields for User, Server, Log Type, From, and To. Below the filter is a table of SSH logs. The table has columns for User, SSH User, Server, Log Type, Status, Encryption, Time, mExec ID, and Actions. The 'Actions' column contains icons for streaming, refresh, and delete. The first row shows a session for user 'evan' on 'ubuntu.noc.com' that ended at 2023-01-14 13:35:32. The second row shows a session for user 'evan' on 'ubuntu.noc.com' that is active at 2023-01-14 13:31:37. The third row shows a session for user 'evan' on 'ubuntu.noc.com' that ended at 2023-01-13 16:43:20. The fourth row shows a session for user 'admin' on 'ubuntu.noc.com' that ended at 2023-01-13 14:33:08.

User	SSH User	Server	Log Type	Status	Encryption	Time	mExec ID	Actions
<input type="checkbox"/>	evan	root	ubuntu.noc.com	output	Ended	0	2023-01-14 13:35:32	  
<input type="checkbox"/>	evan	root	ubuntu.noc.com	output	Ended	0	2023-01-14 13:31:37	  
<input type="checkbox"/>	evan	root	ubuntu.noc.com	output	Active	0	2023-01-13 16:43:20	  
<input type="checkbox"/>	evan	root	ubuntu.noc.com	output	Ended	0	2023-01-13 16:42:32	  
<input type="checkbox"/>	admin	root	ubuntu.noc.com	output	Ended	0	2023-01-13 14:33:08	  

2. Click on the 'Enable streaming button' and set the interval for streaming.

3. Ensure that 'Encrypt SSH Session Logs' is disabled in Settings->General for live streaming.
