Four eyes authorization in Ezeelogin

Four-eye authorization in Ezeelogin is used to view the recordings of any user with only two-factor authentication.

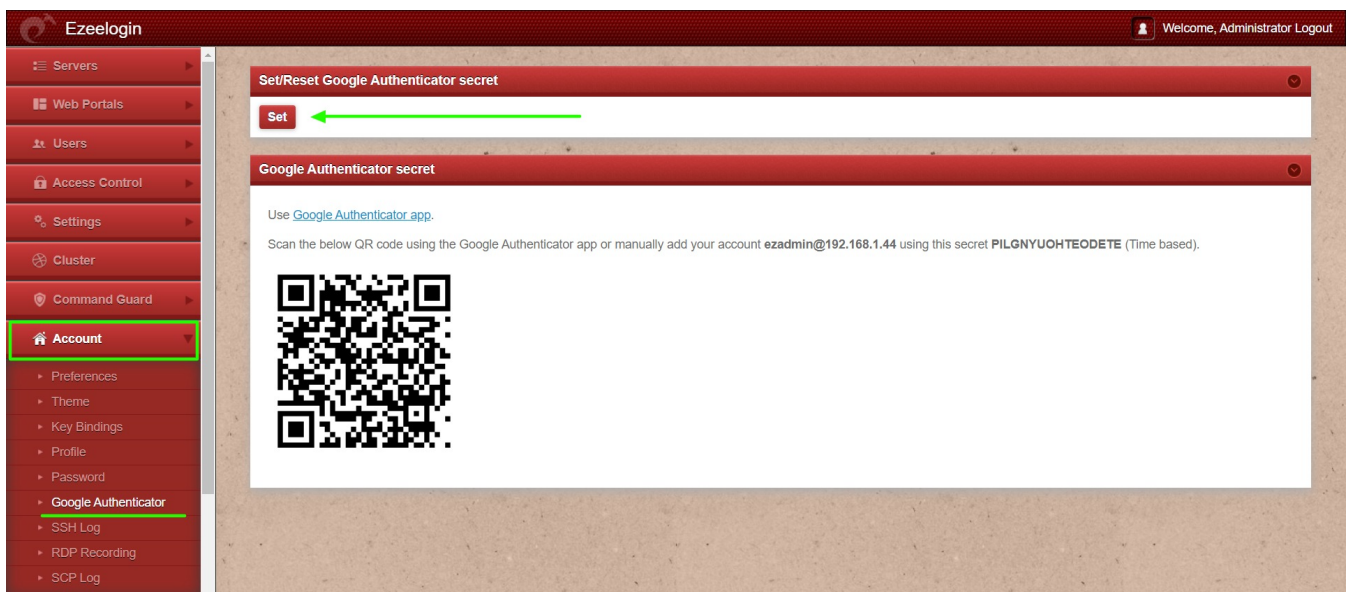

1. Login to Ezeelogin GUI -> Settings -> General -> Security -> Four eyes authorization

2. Make sure Four Eyes Authorization Privilege is enabled for the user who would be granting access to view ssh logs. Go to **Access Control-> User-Action** and grant the user **Four Eye Authorization Privilege**.

3. Ensure that one of the two-factor authentication methods [Google 2FA](#), [Yubikey](#), or [DUO Security](#) is configured for the four eyes authorizing user. Refer below example to setup Google 2FA

4. You have configured four eyes authorization for viewing ssh logs. Go to **Users -> SSH Logs -> select user and server -> View SSH Log**

Ezeelogin Welcome, Administrator Logout
