

How to enable Public key based authentication and Allow root login in SSHD

169 admin October 5, 2024 [Features & Functionalities](#), [Technical](#) 5012

Enabling Key-Based Authentication and Root Login in SSH

Overview: This guide outlines the steps to enable key-based authentication and allow root login in SSH for improved security and administrative access.

Step 1: Open the SSH configuration file using a text editor.

```
root@gateway:~# vi /etc/ssh/sshd_config
```

Step 2: Locate the **PubKeyAuthentication** and **PermitRootLogin** parameters in the configuration file.

Step 3: Set it to 'yes'.

```
PubkeyAuthentication yes
```

```
PermitRootLogin yes
```

Step 4. Restart the ssh daemon so that the new settings come into effect.

```
root@gateway:~# service sshd restart
```
