

# Create more admin users

18 admin June 10, 2024 [Features & Functionalities](#) 8863

## How to create more admin users in Ezeelogin?

**Synopsis:** The admin user account created at the time of installation would be the user that would have all the privileges and is called 'superadmin' as it has the privileges to create more users with admin privileges. The superadmin user account cannot be deleted while other admin users can be deleted.

**Step 1:** [Create new gateway user](#) to Ezeelogin

**Step 2:** Fill in the necessary details and **add the gateway user**. Provide the password of the user used to login to the GUI.

**Add User**

First Name: alex

Last Name:

Username: alex

Email: alex@gmail.com

Password: .....

Security Code: .....

User Group: Admins

Status: ☒ Active ☐ Suspended

Expire: Never

Command Guard: -- None --

Limit IPs: ☐ ☐

Allowed IPs:

Virtual Shell: ☐ ☐

SSH Private Key:

Pass User Through: Inherit

SSH Key Passphrase:

Sub SSH User: -- Select --

LDAP: None

Add user to database only: ☐ ☐

Prompt Reason: ☐ ☐

Force Password Change: ☐ ☐

Authorization Password: .....

Cancel Save

**Step 3:** For security purposes, all users except the superadmin does not have admin privileges by default. **Grant privilege for the newly created user or user group for the admin privileges.**

**Step 3.a:** Refer below example to grant full privilege to **individual user**.

**Control the access of a user to specific actions**

User: alex

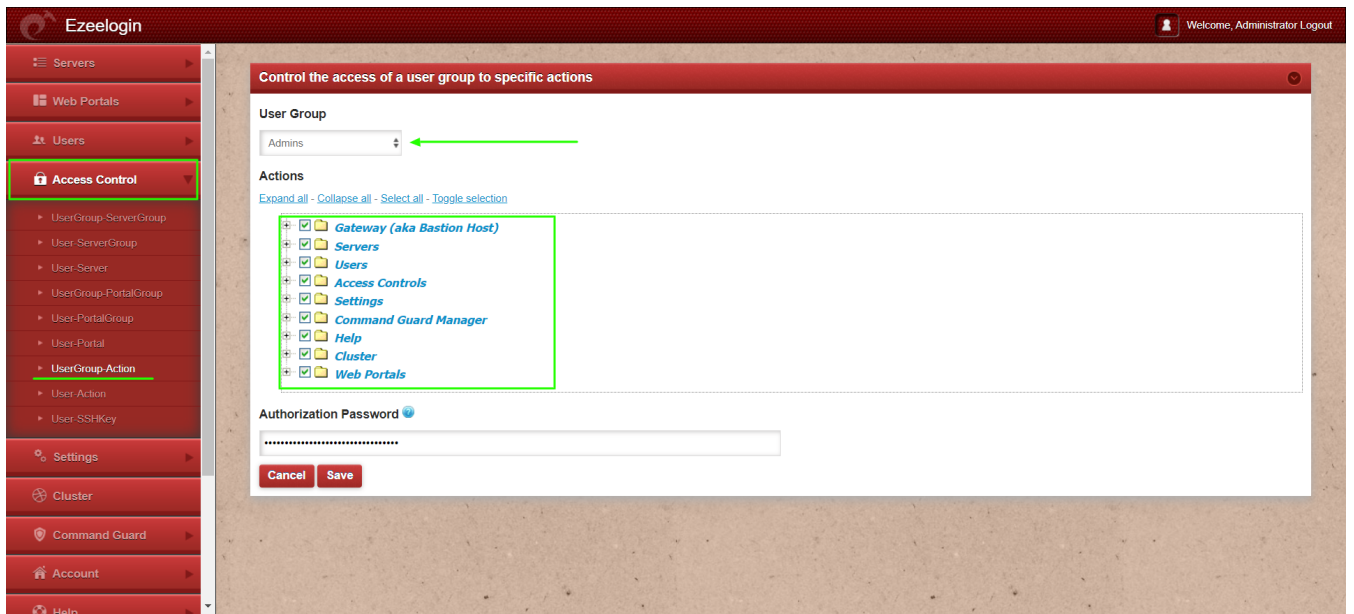

Actions:

- ☒ Gateway (aka Bastion Host)
- ☒ Servers
- ☒ Users
- ☒ Access Controls
- ☒ Settings
- ☒ Command Guard Manager
- ☒ Help
- ☒ Cluster
- ☒ Web Portals

Authorization Password: .....

Cancel Save

**Step 3.b:** Refer below example to grant full privilege to **user group**.
