

# Setting to be changed when sshd is listening on a custom port instead of default port in the ssh jumphost server

196 admin May 27, 2024 [Tweaks & Configuration](#) 4741

## How to set custom SSH port in Ezeelogin gateway?

This article provides an overview of setting up a custom port number when sshd is listening on custom port instead of the default ssh port 22

Navigate to **Settings->General->Miscellaneous->Gateway SSH Port** and specify the SSH port number. This would be the port that ssh daemon would be listening on the ezeelogin gateway server and ezeelogin users would be connecting to this port.
