

How to bypass the group menu in the backend shell and go directly to the entire server listing?

199 admin March 28, 2018 [Tweaks & Configuration](#) 4988

To skip the group menu listed in the backend shell as shown

```
*Linux Cloud instances Linux Servers
All servers          List of all accessible servers
```

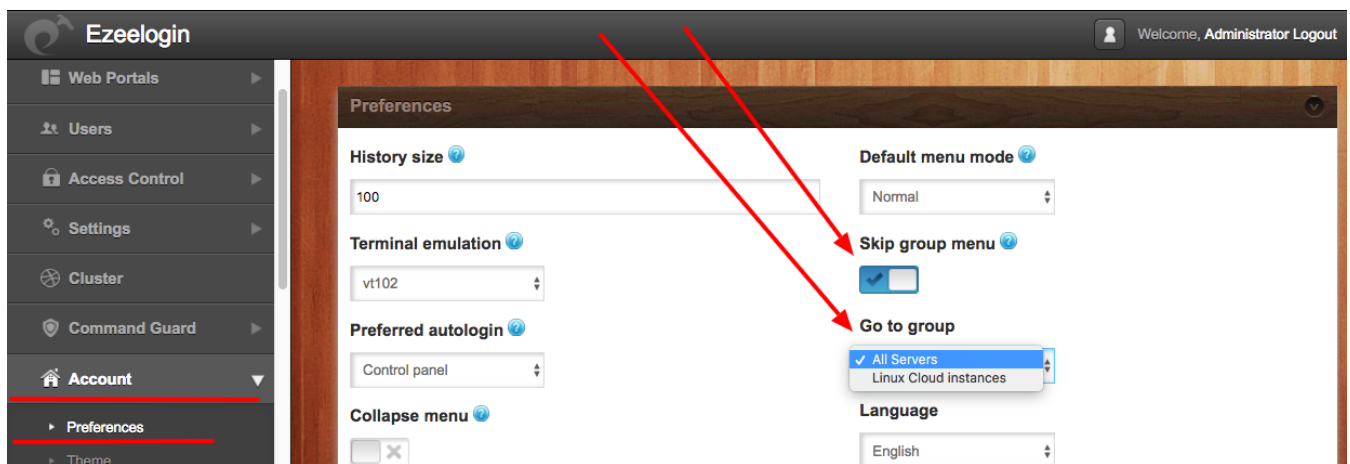

```
GROUPS [Normal / ]
Start typing string to locate. ESC: Clear search, F1/+: Help, F4/!: Exit.
```

and to be presented with the server list as show below as the first screen when you ssh into the ezsh shell.

```
*james.eznoc.com 192.168.56.102 (Linux Cloud instances)
ubu.eznoc.com 192.168.56.119 (Linux Cloud instances)
```

```
SERVERS [All servers] (group) [Normal / ]
Start typing string to locate. ESC: Clear search, F1/+: Help, F4/!: Exit.
```

Navigate to *Account->Preferences* , select *Skip group menu* and choose *Go to group* from the drop down. Select *All Servers* if you want a list of all servers when you ssh to the ezsh shell.

Choose a different *Server Group* under *Go to group* to have different listing in the ezsh shell.
