404 error on login with nginx

How to Solve 404 Errors in Nginx?

Synopsis: This article provides a detailed guide on resolving 404 errors in Nginx.

Ezeelogin installation is under the directory named '**gate**'

Step 1: In the Nginx configuration, within the location directive of the server section that handles Ezeelogin pages, add the following **rewrite rule**:

The modified Nginx configuration is as follows:

Step 2: If the 404 error persists, enable **error logging** by setting the following variable in your Nginx configuration file and check for the rewrite errors in the logs.
