

getting config from other node failed

246 Manu Chacko October 13, 2024 [Common Errors & Troubleshooting](#) 4752

How to solve 'getting config from other node failed' error while installing secondary/slave?

Overview: This article helps Ezeelogin admin users to solve the error '**getting config from other node failed**' encountered while installing secondary/slave.

1. Touch build.dat file in **/usr/local/etc/ezlogin/** directory on **primary node**.

```
:~# touch /usr/local/etc/ezlogin/build.dat
```
