Got this error while upgrade "*ERROR db user: Incorrect datetime value: '0000-00-00 00:00:00' for column 'expiry' at row 1* "

1. Execute the following query on mysql server before upgrade. You can find the Database logins from `/usr/local/etc/ezlogin/ez.conf` file.

Replace the `db_prefix` with value of `db_prefix` from `/usr/local/etc/ezlogin/ez.conf` file.

2. You can also upgrade ezeelogin after disabling MySQL strict mode.
