How do I uninstall Ezeelogin?

Overview: This article provides the command to uninstall Ezeelogin and *erase all its data*, with additional options available to customize the uninstall process if needed.

Step 1: Execute the script below with root privileges to uninstall Ezeelogin from the server:

```
root@gateway:~# php /usr/local/sbin/uninstall_ezlogin.php
```

Follow the prompts

```
#####  
# Ezeelogin uninstaller #  
#####
```

Checking environment... done

Please note that this will uninstall ezeelogin and remove all of its data.

Are you sure you want to continue? (yes/no) :yes

Step 2: If for some reason it fails to uninstall, use the 'force' option shown below to uninstall.
