Step 2. Provide the details for the custom server field

- Name: A name for the custom server field
- Alias: The column title name shown in server listing.
- Description: Brief description on the custom server field
- Type: Type of the custom server field added.
- Encrypted: Shows if the information stored in the field would be encrypted or not.
- Include In Listing: If enabled, the filed will be displayed in the server listing.
- **Sort order:** The order number determines the position of the field in the server edit page. Lower values would be
- Actions: To add or delete custom fields.
