

Connect jumpserver using PuTTY

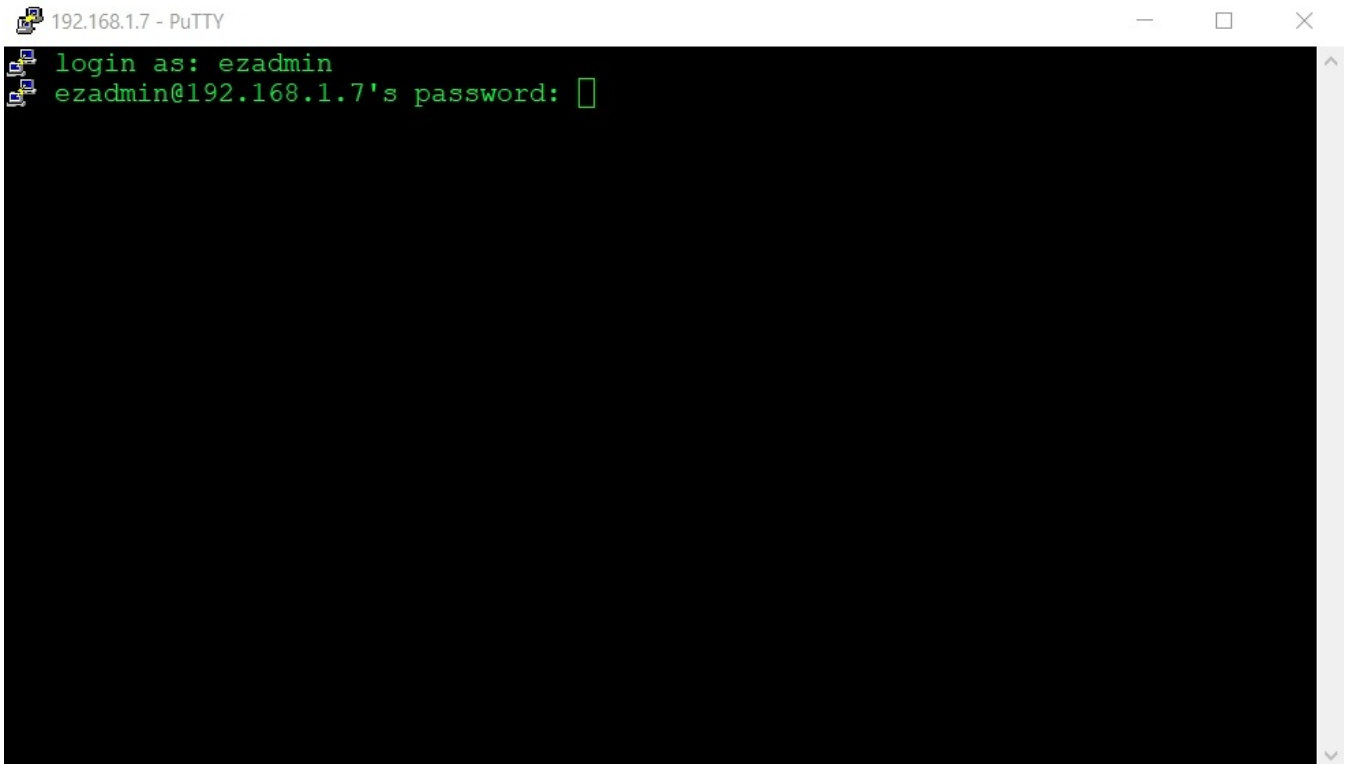

263 Manu Chacko November 19, 2022 [General](#) 8519

How to login to the remote server added in Ezeelogin using PuTTY?

1. Open putty, enter Ezeelogin/Jumpserver **IP or Hostname**, and **Port number** in specific fields, and click on the **Open** button.

2. Enter **Ezeelogin** username and **password**.

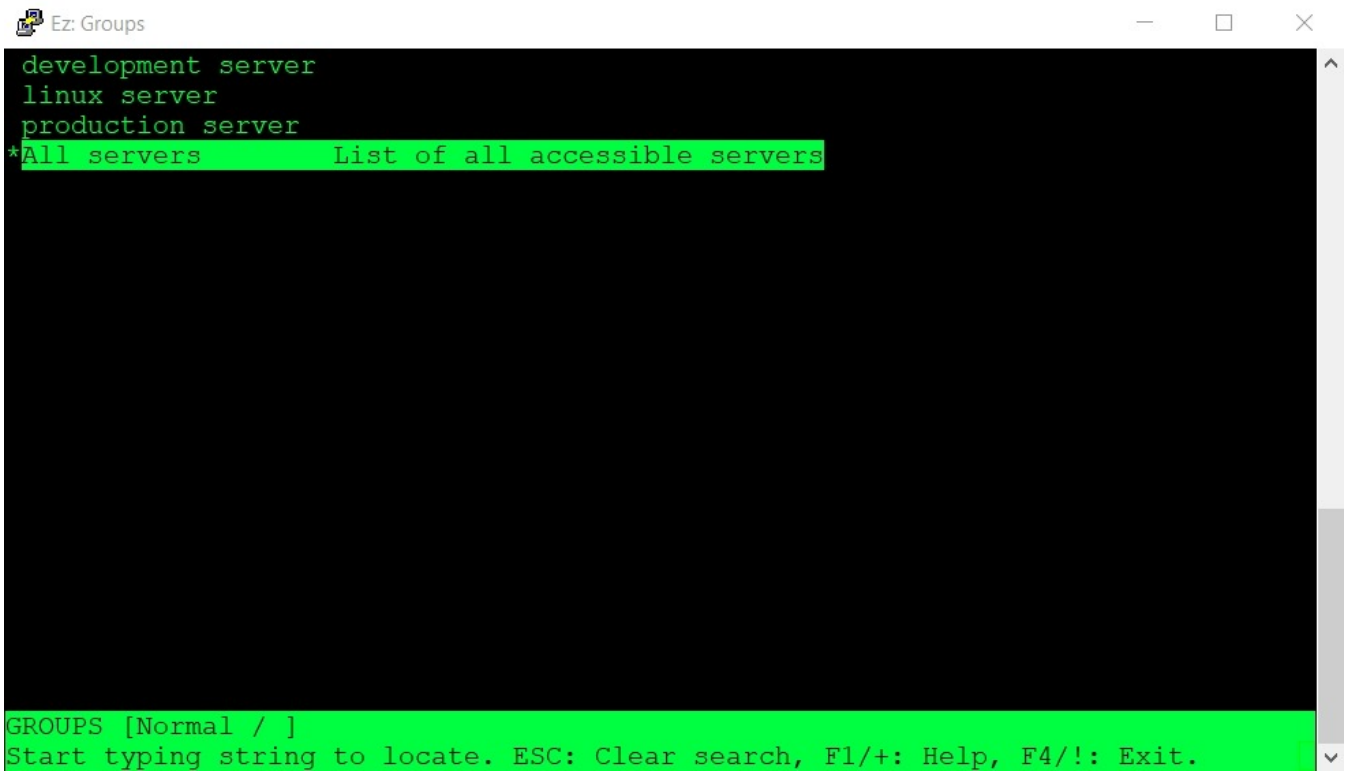

A screenshot of a PuTTY terminal window titled "192.168.1.7 - PuTTY". The terminal displays a green login prompt "login as: ezadmin" followed by a second green prompt "ezadmin@192.168.1.7's password: " with a small square cursor. The rest of the terminal is black.

3. Enter **Security code / Two Factor Authentication** to login to the Ezeelogin shell (ezsh).

A screenshot of a PuTTY terminal window titled "192.168.1.7 - PuTTY". The terminal displays a green prompt "Enter security code: " with a small square cursor. The rest of the terminal is black.

4. After successful login, the user login to **Ezeelogin shell (ezsh)**. The first window will be the list of the **server groups**. Users can navigate using **up**, **down**, and **enter** keys to log in to the server.

Click on the **tab** key on the **server list** to **view the details of the server**. Refer to below screenshot.

```
root@ubuntu22:~# ezinfo
```

Server details:-

```
Name           : ubuntu.server
IP             : 192.168.1.4
SSH port       : 22
SSH User       : root
Password       : %b8y@i2f70ES
Group          : production server
```

^C

```
root@ubuntu22:~#
```
