## Connecting to a remote server managed by ezeelogin using PUTTY

---

**Overview:** This article describes how to connect to a remote server managed by Ezeelogin using PuTTY.

---

**Step 1:** Open PuTTY and enter the **Ezeelogin/Jumpserver IP or Hostname** along with the **Port number**. Click "**Open**" to initiate the connection.

**Step 2.** Provide your Ezeelogin **username and password** when prompted.

**Step 3.** If enabled, **enter the Security code or complete Two Factor Authentication** to access the Ezeelogin shell (ezsh).

**Step 4.** Upon successful authentication, you will enter the Ezeelogin shell (ezsh). The initial screen displays a **list of server groups**. Navigate through the list using **arrow keys** and

press Enter to select a server.

**Step 5.** Use the **Tab** key to view detailed information about the selected server (refer to the screenshot for guidance).

**Step 6.** You can also press '| ' from the server group lists/server lists to know the details of Ezeelogin.

**Step 7.** Select and press enter to log into any server and you will be logged into a remote server via Ezeelogin.
