Connect jumpserver using PuTTY

263 Manu Chacko October 18, 2024 General 10782

Connecting to a remote server managed by ezeelogin using PUTTY

Overview: This article describes how to connect to a remote server managed by Ezeelogin using PuTTY.

Step 1: Open PuTTY and enter the Ezeelogin/Jumpserver IP or Hostname along with the Port number. Click "Open" to initiate the connection.

🕵 PuTTY Configuration		×	
Category:			
 Session Logging Terminal Keyboard Bell Features Window Appearance Behaviour Translation Selection Colours Connection Data Proxy SSH Serial Telnet Rlogin SUPDUP 	Basic options for your PuTTY s Specify the destination you want to connect Host Name (or IP address) 192.168.0.110 Connection type: SSH Serial Other: Telr Load, save or delete a stored session Saved Sessions	ession to Port 22	
	Default Settings	Load Save Delete	
	Close window on exit: Always Never Only on clean exit		
About	Open	Cancel	

Step 2. Provide your Ezeelogin username and password when prompted.

₽ 192.168.0.110 - PuTTY	-	×
d ^a login as: admin d ^a admin8152.168.0.110's password: []		^

Step 3. If enabled, **enter the Security code or complete Two Factor Authentication** to access the Ezeelogin shell (ezsh).

Step 4. Upon successful authentication, you will enter the Ezeelogin shell (ezsh). The initial screen displays a **list of server groups**. Navigate through the list using **arrow keys** and

press Enter to select a server.

Step 5. Use the **Tab key** to view detailed information about the selected server (refer to the screenshot for guidance).
