

## Ezsh shell disallowed

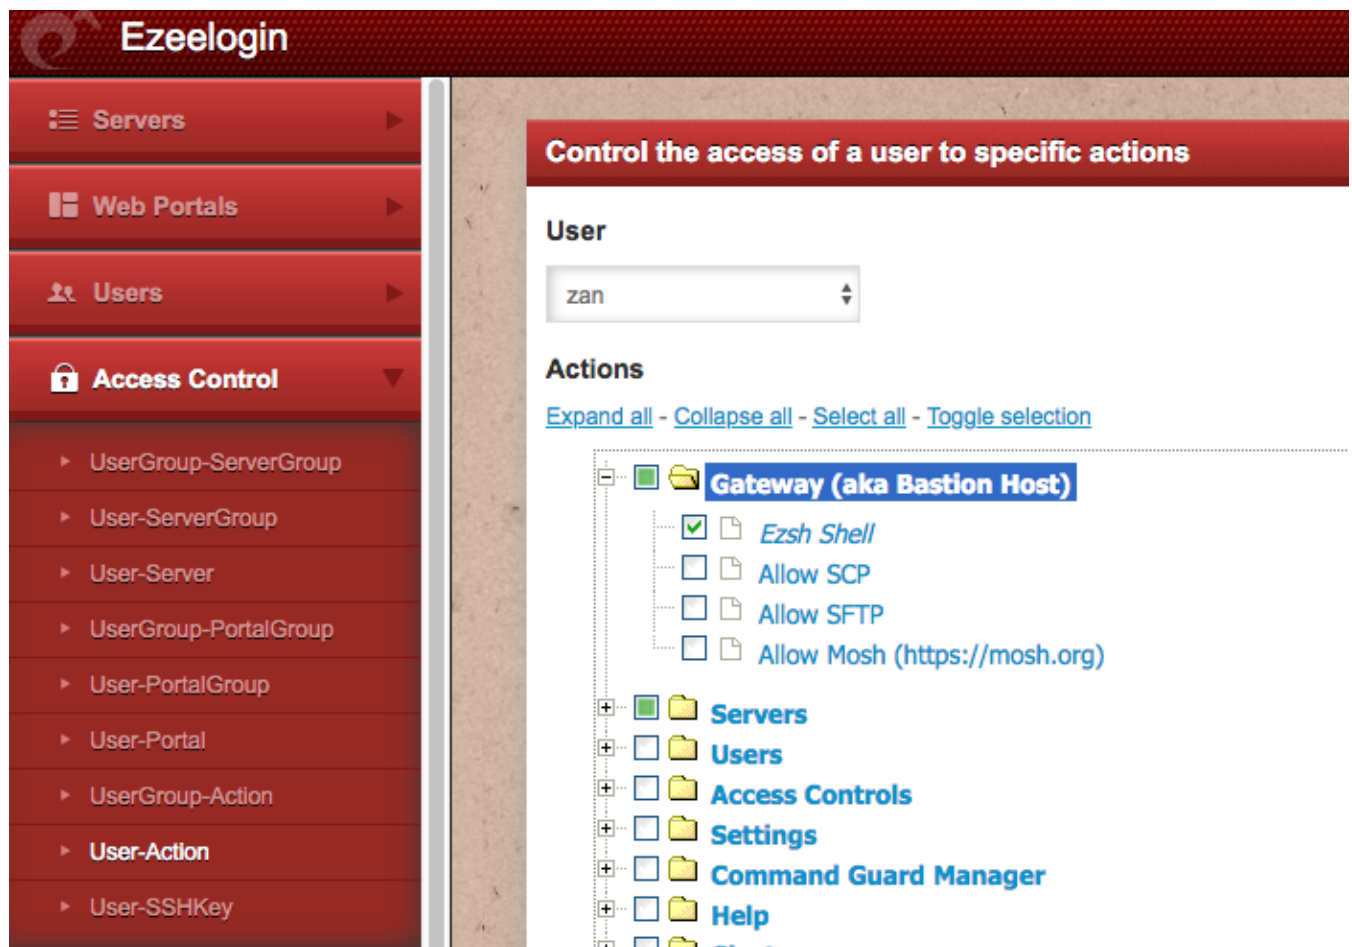

269 admin February 4, 2021 [Features & Functionalities](#) 4980

ssh gateway users are getting the error "Ezsh shell disallowed" while trying to access the backend via ssh.

The ssh gateway user needs to be explicitly given access to the ezsh shell in access control. As you can see below the user *zan* is granted access to ezsh shell under Access Control -> User-Action->Gateway->Ezsh Shell or under User-Group ->Action->Gateway->Ezsh Shell .

Note that the gateway user needs be the super admin user or a privileged user that has access to Access Control-> User-Action->Gateway->Ezsh shell

If you want to allow ezsh shell for all users run the following command on jumpserver
