

How to renew/update standalone license ?

289 Riya Francis January 31, 2022 [Installation](#), [Migration & Maintenance](#) 7163

Renew/update the standalone license

In order to renew the standalone license, you have to replace the old license file with the newest in the Ezeelogin installed server.

1. Backup the existing license file

```
root@jumpserver :~# cp  
/usr/local/etc/ezlogin/lic.dat  
/usr/local/etc/ezlogin/lic.dat_backup
```

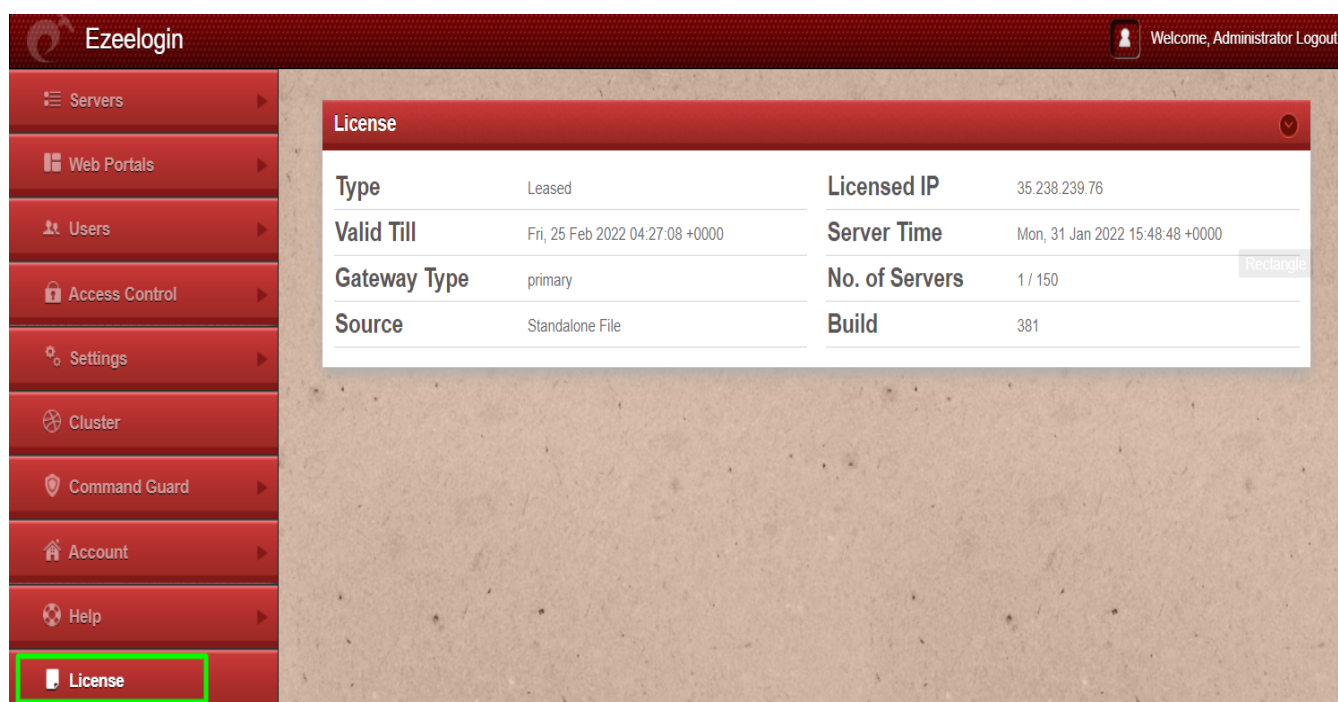

Make sure to upload the license file (lic.dat) to the server

2. Replace the existing license file with new file

```
root@jumpserver :~#
```

Ensure that the path to the license file is correct and the file permissions to the new file match the old license file.

Login to the Ezeelogin software GUI and **click on the license tab** to reflect the updates.

The screenshot displays the Ezeelogin software interface. On the left is a vertical sidebar with a dark red background and white text for various menu items: Servers, Web Portals, Users, Access Control, Settings, Cluster, Command Guard, Account, Help, and License. The 'License' item at the bottom is highlighted with a green rectangular border. The main content area has a light brown, textured background. At the top of this area is a red header bar with the word 'License' in white. Below the header is a white table with two columns. The left column contains labels: Type, Valid Till, Gateway Type, and Source. The right column contains values: Leased, Fri, 25 Feb 2022 04:27:08 +0000, primary, and Standalone File. To the right of this table is another white table with two columns. The left column contains labels: Licensed IP, Server Time, No. of Servers, and Build. The right column contains values: 35.238.239.76, Mon, 31 Jan 2022 15:48:48 +0000, 1 / 150, and 381. A small 'Rectangle' watermark is visible over the 'No. of Servers' value.

License	
Type	Leased
Valid Till	Fri, 25 Feb 2022 04:27:08 +0000
Gateway Type	primary
Source	Standalone File

Licensed IP	35.238.239.76
Server Time	Mon, 31 Jan 2022 15:48:48 +0000
