

How to change the default backup directory of Ezeelogin installation ?

296 Riya Francis February 22, 2024 [Technical](#) 3040

Change the default backup directory

To change the default backup directory while running the Ezeelogin bacup script backup_ezlogin.php, use the "-out " parameter with the backup script followed by the specified directory.

```
root@localhost:~#
```

Note: Include the trailing slash (/) at the end of the directory path
