

How to prevent putty window from closing during ssh

305 admin August 28, 2024 [Common Errors & Troubleshooting](#), [General](#) 34406

Prevent PuTTY window from closing during an SSH session and display the error message?

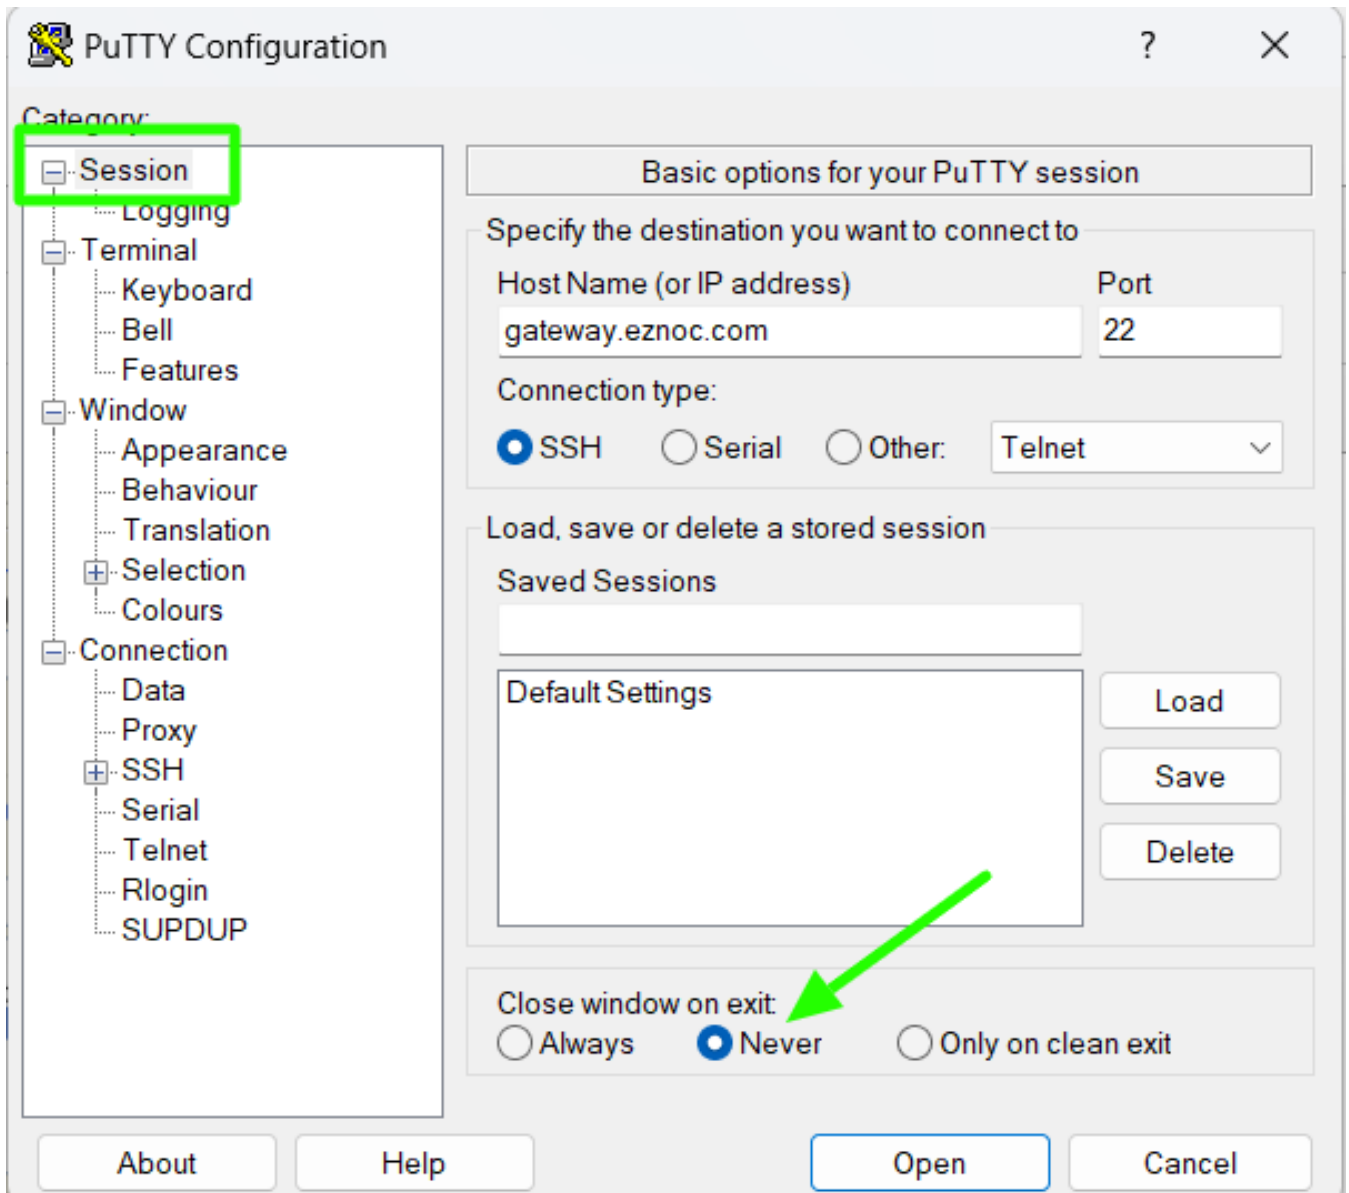

The advertisement features a dark green background. In the top left corner is the EZEELOGIN logo. The main text reads "Setup your SSH jump server in 30 minutes" in white. Below this is a white button with the text "30 Days Free Trial". On the right side, there is an illustration of a blue server rack with a yellow alarm clock on top, symbolizing quick setup and reliability.

Overview: This article explains how to prevent PuTTY windows from closing during an SSH session if there is any error on the server side.

By default, PuTTY window will close during an SSH session if an error occurs on the server side, without displaying the error message explaining why the session failed.

Step 1: To prevent PuTTY window from closing during an SSH session and to view the error message on the server side, set '**Close Window on exit**' to '**Never**' under the **session** tab. This is useful in troubleshooting SSH failure while accessing a remote server.
