

# How to upgrade OpenSSH in Centos ?

331 Vishnupriya January 28, 2025 [General](#), [Technical](#) 84707

The advertisement banner features a dark green background. On the left, the Ezeelogin logo is displayed in white. Below it, the text 'Setup your SSH jump server in 30 minutes' is written in a large, bold, white font. A white button with the text '30 Days Free Trial' is positioned below the main text. On the right side, there is a stylized illustration of a server rack with a yellow alarm clock on top, symbolizing quick setup.

---

## Upgrade OpenSSH in Centos.

---

**Overview:** This article details how to upgrade OpenSSH in CentOS, including dependencies installation, source download, compilation, installation, verification, and post-upgrade checks for Ezeelogin functionality.

---

1. First you need to install a few dependencies, like development tools or build essentials and the other required packages :

```
root@localhost:~ yum groupinstall "Development Tools"
root@localhost:~ yum install zlib-devel openssl-devel
```

- Make sure to backup SSH configurations before upgrading.

```
:~# cp /etc/ssh/sshd_config /etc/ssh/sshd_config.bak
```

## 2. Download the OpenSSH version 9.0.

```
root@localhost:~ wget -c https://cdn.openbsd.org/pub/OpenBSD/OpenSSH/portable/openssh-9.0p1.tar.gz

root@localhost:~ tar -xzf openssh-9.0p1.tar.gz

root@localhost:~ cd openssh-9.0p1/
```

## 3. Install PAM and SELinux Headers.

```
root@localhost:~ yum install pam-devel libselinux-devel
```

## 4. Compile and install SSH from sources.

```
root@localhost:~ ./configure --with-pam --with-selinux --with-privsep-path=/var/lib/ssh/ --sysconfdir=/etc/ssh

checking for cc... cc
checking whether the C compiler works... yes
checking for C compiler default output file name... a.out
checking for suffix of executables...
checking whether we are cross compiling... no
checking for suffix of object files... o
checking whether we are using the GNU C compiler... yes
checking whether cc accepts -g... yes
checking for cc option to accept ISO C89... none needed
checking if cc supports C99-style variadic macros... yes
checking build system type... x86_64-pc-linux-gnu
```

```
checking host system type... x86_64-pc-linux-gnu

```

```
Compiler: cc
```

```
Compiler flags: -g -O2 -pipe -Wall -Wpointer-arith -Wuninitialized -Wsign-compare  
-Wformat-security -Wsizeof-pointer-memaccess -Wno-pointer-sign -Wno-unused-result  
-fno-strict-aliasing -D_FORTIFY_SOURCE=2 -ftrapv -fno-builtin-memset -fstack-  
protector-strong -fPIE
```

```
Preprocessor flags: -D_XOPEN_SOURCE=600 -D_BSD_SOURCE -D_DEFAULT_SOURCE
```

```
Linker flags: -Wl,-z,relro -Wl,-z,now -Wl,-z,noexecstack -fstack-protector-strong  
-pie
```

```
Libraries: -lcrypto -ldl -lutil -lz -lcrypt -lresolv -lselinux  
+for sshd: -lpam
```

PAM is enabled. You may need to install a PAM control file  
for sshd, otherwise password authentication may fail.

Example PAM control files can be found in the contrib/  
subdirectory

```
root@localhost:~ make
```

```
root@localhost:~ make install
```

5. Once you have installed OpenSSH, restart SSH and check the version of OpenSSH

```
root@localhost:~ ssh -V
```

```
OpenSSH_9.0p1, OpenSSL 1.1.0g
```

**Note:** Make sure that you can add a user, reset the password of a user from the Ezeelogin GUI and you can log in to servers from the Ezeelogin shell after the OpenSSH upgrade.

6. Refer to the article below if you encounter any issues with keys after upgrading OpenSSH.

[https://www.ezeelogin.com/kb/article/userauth\\_pubkey-signature-algorithm-ssh-rsa-not-in-pubkeyacceptedalgorithms-518.html](https://www.ezeelogin.com/kb/article/userauth_pubkey-signature-algorithm-ssh-rsa-not-in-pubkeyacceptedalgorithms-518.html)

The banner features the Ezeelogin logo in the top left corner. The main text reads "Setup your SSH jump server in 30 minutes" in a large, bold, white font. Below this text is a white button with the text "30 Days Free Trial". On the right side of the banner, there is an illustration of a server rack with a yellow alarm clock on top, symbolizing speed and time efficiency.
