

How do I change the password management option for all remote servers ?

332 Riya Francis June 25, 2021 [Technical](#) 2167

How do I change the Ezeelogin password management option to "automatic" for all remote servers?

Refer [Password management in Ezeelogin](#) to get more ideas about different password management options in Ezeelogin.

Take a backup of the Ezeelogin database by the following command.

```
root@jumpserver:~#
```

Find the database prefix from /usr/local/etc/ezlogin/ez.conf in Ezeelogin gateway server

```
root@jumpserver:~# cat /usr/local/etc/ezlogin/ez.conf
system_folder /var/www/ezlogin/
force_https yes
uri_path /
db_host localhost
db_port /var/run/mysqld/mysqld.sock
db_name ezlogin_por
db_user ezlogin_cxy
db_pass ymhbtPaY)VzD2g]84
db_prefix casmbn_
cookie_encryption_key D8$Frp5fF_FF
cookie_name rlbup
```

```
cookie_path /  
  
www_folder /var/www/html/ezlogin/  
  
admin_user ezadmin  
  
mysql_encrypt no
```

1. Run the following query to change the password management option to "automatic"

Replace the "prefix_" with the value given in the /usr/local/ezlogin/ez.conf of your Ezeelogin jumpserver.

```
root@jumpserver:~#
```

2. For changing password management to "automatic" for a specific server group follow the below steps:-

- a. Login to MySQL server and use Ezeelogin database.

Replace ezlogin_xyz with your Ezeelogin database name.

b. Find servergroup_id from MySQL server and specify it on the query.

c. Replace servergroup_id that corresponds to the server group for which you want to change password management to "automatic".
