

## Enable Custom Server fields for Ezeelogin Users from database

367 Vishnupriya January 1, 2021 [General](#) 1960

1. To enable custom server fields for all users , run the following command:

```
__root@localhost:~__ php /usr/local/ezlogin/ez_queryrunner.php  
"replace into prefix_preferences (user_id, name, value) select id,  
'show_custom_fields_ezsh' as name, 'Y' as value from prefix_users"
```

2. After executing the above command the user can log in to Ezsh shell and can view the custom server field by placing the cursor on the server you are trying to access and press tab[provides server information].

Server details

```
Name      : developmentservers.com
IP        : 192.168.18.68
SSH port  : 22
SSH User  : root
Group     : openfire
contact   : 112289000
```

Press any key to continue... █
