

How to enable mail notifications in Ezeelogin Jump Host

371 Nesvin KN July 27, 2024 [Features & Functionalities](#) 3067

Enabling and configuring email notifications in ezeelogin

Overview: This article covers configuring email notifications in Ezeelogin. It includes adding a valid email address for the super admin, updating the notification sender's address and name, and ensuring a mail server is installed. It also provides steps to enable failed login, change, and shell access notifications in the Ezeelogin Jump Host settings.

Edit the super admin user and add a valid email address to receive the notifications. Refer below screenshot.

To change from address and name navigate to **Settings -> General -> Miscellaneous -> Notification From Name / Notification From Email**

- Servers
- Web Portals
- Users
- Access Control
- Settings**
- General
- Branding
- Control Panels
- Data Centers

Make sure you have installed a mail server on your server. Refer below article to install Sendmail on the gateway server.

[Configure SMTP on Ezeelogin Jump server](#)

Step 1. How to enable failed login mail notification in Ezeelogin Jump Host?

Failed login notification -- Send mail notification to super admin user for failed login in Ezeelogin GUI.

You can enable notification in **Settings -> General -> Security -> Failed Login Notification**

- Servers
- Web Portals
- Users
- Access Control
- Settings**
 - General
 - Branding
 - Control Panels
 - Data Centers
 - API
 - LDAP
 - SAML
 - RADIUS
 - Server Fields
- Cluster
- Command Guard
- Account
- Help
- License
