No Two-factor Authentication configured. Contact Administrator

No Two-factor Authentication enabled
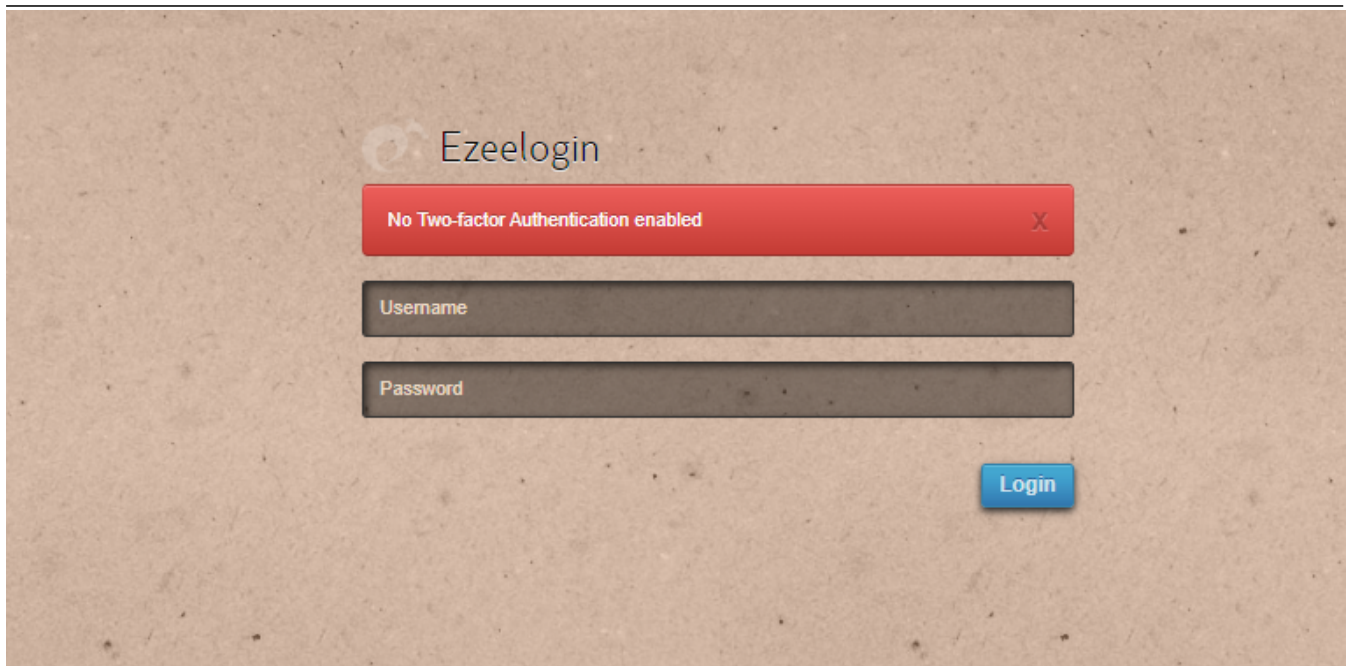

This error happens when we enforce Two-Factor authentication without enabling any of the Two-Factor authentications. Run the following command to disable Force Two Factor Authentication. You should re-enable it from the Ezeelogin GUI as follows.

```
root@jumpserver:~#  php /usr/local/ezlogin/ez_queryrunner.php
"update prefix_settings SET value = 0 WHERE name =
'two_factor_auth'"

Or

root@jumpserver:~# php
/usr/local/ezlogin/ez_queryrunner.php   "update
prefix_usergroups SET force_tfa = 'N'"
```
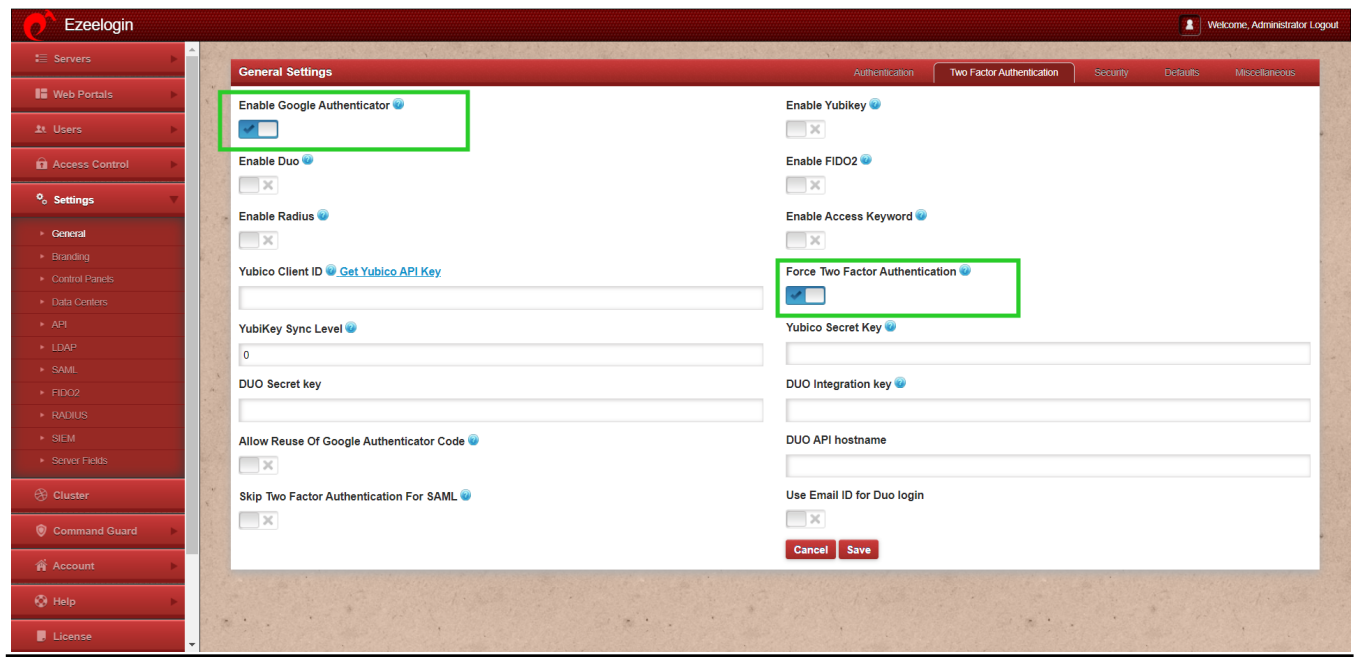

You should re-enable the **Force Two-Factor Authentication and Two-factor Authentication**

which you have used before

From **Ezeelogin GUI > Settings > General > Two-Factor Authentication.**
