

RDP Error: This computer can't connect to the remote computer

395 Nesvin KN January 29, 2025 [Common Errors & Troubleshooting](#) 3242

How to solve "Remote Desktop Connection Error: This computer can't connect to the remote computer" when accessing RDP via Ezeelogin tunnel ?

Overview: This article helps in resolving the "**Remote Desktop Connection Error: This computer can't connect to the remote computer**" issue encountered when using the [Ezeelogin tunnel feature](#) to access RDP.

- **NLA is currently supported.** If the user **enables** it, the **username and password must be saved** when adding the RDP server to Ezeelogin.
- If the user **does not enable NLA**, they can choose whether to save the username and password in Ezeelogin, as **both options will work**.

Remote Desktop Connection

This computer can't connect to the remote computer.

Try connecting again. If the problem continues, contact the owner of the remote computer or your network administrator.

OK

Help

1. ERROR(1): Tunnel access from unauthorized IP: 0.0.0.0 (127.0.0.1)

Step 1(A): Check the **ezsh.log** of gateway user with which you logged into Ezeelogin backend(ezsh). Replace the username with the actual username.

```
root@gateway ~]# tail /home/{username}/ezsh.log
```

Example:

```
root@gateway ~]# tail /home/admin/ezsh.log
```

```
Authentication by SSH key failed!
```

```
Authentication by SSH key failed (windows.com, Administrator):
```

```
Username/PublicKey combination invalid
Tunnel access from unauthorized IP: 0.0.0.0 (127.0.0.1)
```

Step 1(B): To resolve the above error, login to Ezeelogin GUI and navigate to **Settings -> General -> Security** and enable **Tunnel Allow All**.

Ezeelogin

Welcome, Administrator Logout

2. ERROR(2): creation failed: Permission denied

Step 2(A): Check the **ezsh.log** of gateway user with which you logged into Ezeelogin backend(ezsh). Replace the username with the actual username.

```
root@gateway ~]# tail /home/admin/ezsh.log

SSH log file (/var/log/ezlogin/full/john/master~auto-
test-01.master.eznoc.com~Mon_May_9_22:38:25_2018) creation failed:
Permission denied
```

Step 2(B): To resolve the above error, run the following command on the gateway server and try again:

```
root@gateway ~]# /usr/local/ezlogin/eztool.php -fix_log_permissions
```
