

Remote server ssh username and password to be prompted in the backend shell

425 admin September 1, 2023 [Features & Functionalities](#) 1723

Ezeelogin configuration so that the remote SSH username and password would be prompted when ssh'ing into the remote server in the ezsh interface?

Edit the server where the remote SSH username and password must be prompted.

Empty the SSH Password field and the remote SSH login user field and save it.

View the server details in the ezsh shell and ensure that the remote SSH User and the Password field are empty.

```

Server details
Name       : Deb2394_servers
IP        : 192.168.0.114
SSH port  : 22
SSH User  :
Password :
Group    : Log_Servers

```

SSH into the remote server from the ezsh interface and the remote username and password would be prompted.

The user can then input the username and password to login into the remote server.

```

Username: mark
Password: 

```
