

Remote server ssh username and password to be prompted in the backend shell

425 admin August 6, 2024 [Features & Functionalities](#) 2137

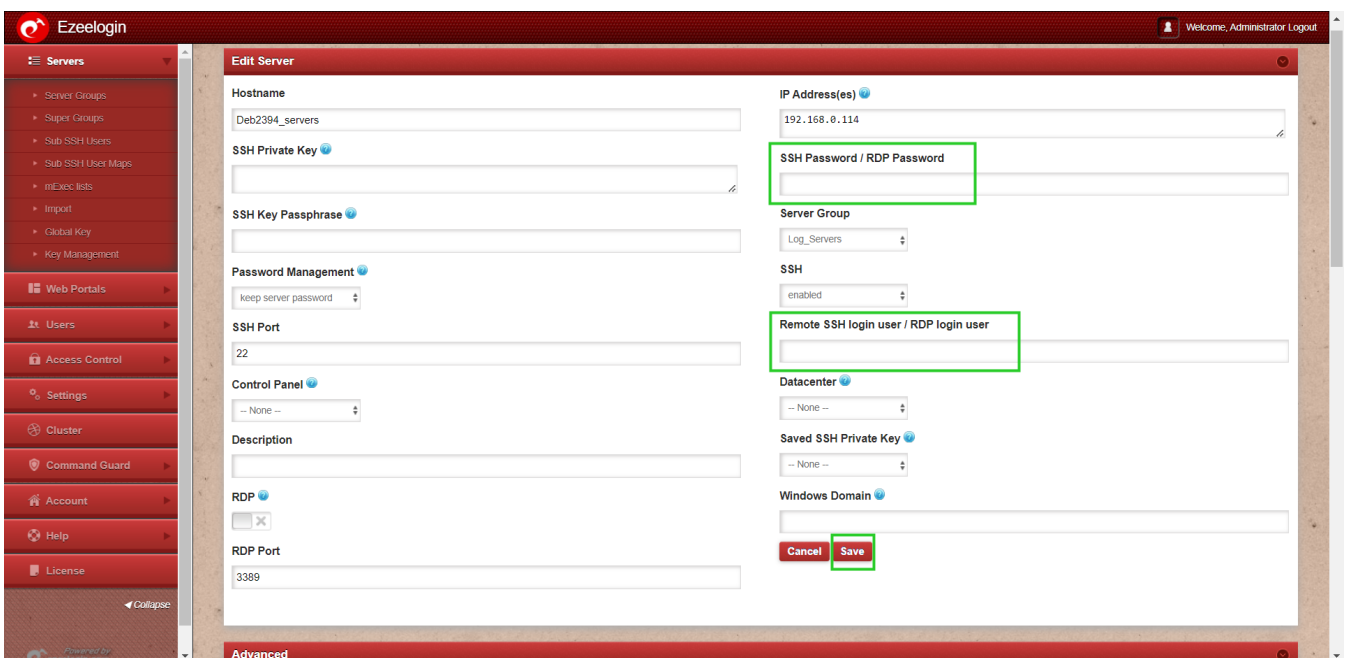

Configuring Ezeelogin to Prompt for Remote SSH Credentials in ezsh Interface.

Overview: This article details the process for configuring Ezeelogin to prompt for remote SSH credentials (username & password) in the ezsh interface.

1. Navigate to the [Server](#) and edit the remote server where the remote SSH username and password must be prompted.

- Empty the SSH Password field and the remote SSH login user field and save it.

2. View the server details in the [ezsh shell](#) and ensure that the remote SSH User and the Password field

are empty.

```
Server details
Name       : Deb2394_servers
IP        : 192.168.0.114
SSH port   : 22
SSH User   :
Password   :
Group      : Log_Servers
```

3. SSH into the remote server from the [ezsh](#) interface and the remote username and password would be prompted.

- The user can then input the username and password to log into the remote server.

```
Username: mark
Password: █
```
