## Remote server ssh username and password to be prompted in the backend shell

425 admin August 6, 2024 Features & Functionalities 2542

## **Configuring Ezeelogin to Prompt for Remote SSH Credentials in ezsh Interface.**

**Overview**: This article details the process for configuring Ezeelogin to prompt for remote SSH credentials (username & password) in the ezsh interface.

1. Navigate to the <u>Server</u> and edit the remote server where the remote SSH username and password must be prompted.

• Empty the SSH Password field and the remote SSH login user field and save it.

2. View the server details in the ezsh shell and ensure that the remote SSH User and the Password field

are empty.

Name         : Deb2394_servers           IP         : 192.168.0.114           SSH port         : 22           SSK User         :
SSH port : 22 SSH User :
SSH User :
Password :
Group : Log_Servers

3. SSH into the remote server from the <u>ezsh</u> interface and the remote username and password would be prompted.

• The user can then input the username and password to log into the remote server.
