

How to view IPMI password from the Ezeelogin GUI?

435 Vishnupriya July 28, 2021 [Security Features](#) 1578

To view IPMI password

1. Ensure that you are accessing Ezeelogin with HTTPS and 2-factor authentication enabled
2. After [enabling HTTPS](#) and [2 FA](#), you need to click on the + sign near the server name to view the IPMI password.

The first screenshot shows the Ezeelogin 'Servers' page. A table lists two servers: 'developmentsservers.com' and 'productionsservers.com'. A green arrow points to the '+' icon next to the server name 'productionsservers.com'.

The second screenshot shows the configuration page for the selected server. The 'IPMI Password' field is highlighted with a green box, displaying the value 'amrootamroot'.

You can view the IPMI password as shown below
