Is it possible to login to Ezeelogin with a disabled AD user?

441 Nesvin KN August 2, 2024 General 1909

Will a user be suspended from Ezeelogin if the corresponding user is suspended in Active Directory / LDAP?

Suspending a user account in Windows Active Directory (AD)/LDAP does not suspend the corresponding user account in Ezeelogin however, the user will not be able to login into the Ezeelogin GUI or Ezeelogin backend (ezsh). The user has to be suspended manually in Ezeelogin and will not be automatically synced from AD/LDAP.

Step 1: To suspend a user from Ezeelogin gateway navigate to **Users** -> **Edit user** -> Change status to **suspended**.
