```
root@jumpserver:~# mysql -u db_user -p db_name
```

3.Run the following command to disable IP restriction for a gateway ssh user of Ezeelogin.

Replace "dbprefix_" with the value of dbprefix_ in /usr/local/etc/ezlogin/ez.conf of your Ezeelogin jump server. For example "dbprefix_users" is to be replaced with "eltq_users" here.

```
UPDATE prefix_users SET ip_enable='N', status=1 WHERE
username='myuser';
```

You have to use the correct db_name and dbprefix_ from ez.conf if you are running the MySQL commands manually.
