

# RDP SSL Error

464 Nesvin KN December 3, 2021 [Common Errors & Troubleshooting](#) 1592

## How to fix RDP SSL error in Ezeelogin?

You need to copy paste the certificate you are using on web server.

Refer to below example to copy paste the self-signed certificate to fix RDP SSL Error.

Also, make sure that the .pem files are readable by the webserver user such as nobody/www-root/apache, etc. An easy way to grant the web user read privileges would be `chmod 644 /usr/local/etc/ezlogin/*.pem`
