

What are the scenarios when the security code is prompted?

475 Vishnupriya February 23, 2022 [Getting Started](#) 2882

Security code for [Ezsh shell](#)

1.The static security code is used only when 2FA is not enabled.

2. Refer the following articles to disable 2fa

<https://www.ezeelogin.com/kb/article/how-do-i-disable-google-2-factor-authentication-or-other-2factor-mechanisms-in-the-gui-36.html>

<https://www.ezeelogin.com/b/article/disable-two-factor-authentication-40;2fa-google-yubikey-access-keyword-duo-41;-68.html>

2.The security code would be prompted when you ssh to the Ezsh shell after entering the Ezeelogin user password as shown in the screenshot below.

```
Enter security code: |
```

3. You can set or change the security code from the Ezeelogin user account under **Account> Password**

Ezeelogin Welcome, Administrator Logout

Change password, security code, two factor secret

New Password <input type="text"/> Generate	Confirm Password <input type="text"/>
New Security Code <input type="text"/> Generate	Confirm Security Code <input type="text"/>
SSH Private Key	SSH Key Passphrase
<input type="text"/>	Authorization Password
	Cancel Save

- Servers
- Web Portals
- Users
- Access Control
- Settings
- Cluster
- Command Guard
- Account**
 - Preferences
 - Theme
 - Key Bindings
 - Profile
 - Password**
 - SSH Log
 - RDP Recording
 - SCP Log

It is mandatory to use security code or 2fa while ssh ing to the Ezsh shell.
