How to hide remote server passwords from non-privileged Ezeelogin gateway users?

Overview: This article helps Ezeelogin admin users on how to hide remote server passwords from non-privileged users on the Ezeelogin gateway.

Server details

Name : web.eznoc.com
IP : 192.168.1.57
SSH port : 22
SSH User : root
Password : jTKNj{KdvUXNdQadckrgAdXk2yUWRaB
Group : Linux Servers

Press any key to continue...

Step 1: To prevent non-privileged gateway users from viewing remote server passwords from both GUI and backend, disable the "View Password" option in Access Control by navigating to **Access Control -> User Action**.

The screenshot shows the Ezeelogin web interface. On the left sidebar, the 'Access Control' menu is highlighted with a green box. Below it, the 'User Action' sub-menu is also highlighted with a green box. The main content area is titled 'Control the access of a user to specific actions'. A dropdown menu shows the user 'John'. Under the 'Actions' section, there is a tree view with 'Gateway (aka Bastion Host)' and 'Servers' expanded. The 'View Password' option is checked and highlighted with a green arrow. Other actions like 'Add Server', 'Edit Server', 'Delete Server', etc., are also listed with checkboxes.

Once the "View Password" feature is disabled in Access Control, the password will no longer be visible to the user.

Ezeelogin Welcome, John Logout
