Where is the password of the user is stored?

483 Krishnaja February 22, 2022 [Common Errors & Troubleshooting](#) 1385

The UI authentication hash is stored in the database user table and the ssh authentication hash is stored in the /etc/shadow file.

For Example, we have user tony, the ssh authentication hash is stored in the **/etc/shadow** file as follows:

The UI authentication hash is stored in the database user table.

To find the UI authentication table login to database and select the user table and run the below command:
