

Ldap Failed

495 Jisna Joseph August 19, 2024 [Common Errors & Troubleshooting](#) 7097

How to solve Ldap failed error in Ezeelogin?

Overview: This article explains how to troubleshoot an LDAP failure in Ezeelogin when the LDAP server is not reachable, including using the telnet command to check connectivity to the LDAP server.

```
[root@localhost ~]# ssh luke@192.168.56.196
luke@192.168.56.196's password:
Activate the web console with: systemctl enable --now cockpit.socket

Last login: Sat Apr  9 08:14:08 2022 from 192.168.56.196
[luke@localhost ~]$
[luke@localhost ~]$
[luke@localhost ~]$ ezsh
LDAP failed
[luke@localhost ~]$ |
```

This error occurs when your [LDAP server](#) is not reachable from Ezeelogin server. You can check this by running the following command.

```
:~ telnet ldap_server_ip 389
```

For Example:

```
:~ telnet 192.168.56.110 389
Trying 192.168.56.110...
telnet: connect to address 192.168.56.110: No route to host
```
