

ERROR: User has not set a security code ldap sasl binds : Cannot contact LDAP server

512 Jisna Joseph January 23, 2025 [Common Errors & Troubleshooting](#) 2016

How to solve ERROR: User has not set a security code ldap_sasl_bind_s (-1): Can't contact LDAP server

Overview: This article explains how to resolve the "ERROR: User has not set a security code ldap_sasl_bind_s (-1): Can't contact LDAP server" error by creating a softlink to the SSL directory or enabling the "skip LDAP user verification" option in Ezeelogin version 7.27.6 and higher.

If this error occurs, create a softlink to the system SSL directory by executing the following command on the server.

```
[root@gateway ~]# openssl version -d
```

```
OPENSSLDIR: "/etc/pki/tls"
```

Once the path to the SSL directory is obtained, run the following command:

```
[root@gateway ~]# ln -s path/to/ssl/dir /usr/local/ssl
```

for example:

```
[root@gateway ~]# ln -s /etc/pki/tls /usr/local/ssl
```

OR

For Ezeelogin version 7.27.6 and above, enable the "Skip LDAP User Verification" option under **Settings -> General -> [Two factor Authentication](#)-> Skip ldap user verification**. This will skip LDAP user verification in the Ezeelogin shell (Ezsh) and **disable the Security Code Ldap** under **Settings -> General -> Authentication -> Security code ldap**. Refer below screenshots.

Ezeelogin Welcome, Administrator Logout

Authentication **Two Factor Authentication** Security Defaults Miscellaneous

General Settings

Enable Google Authenticator

Enable Duo

Enable Radius

Yubico Client ID [Get Yubico API Key](#)

YubiKey Sync Level
