How to add Cpanel as webportal?

Overview: This article describes the steps to add Cpanel as a web portal, including creating a group under Web Portals, adding WHM, configuring auto-login if needed, and saving the details to access the portal.

[Webproxy, Webpanel, Webportal, Controlpanel](#)

To add Cpanel as a web portal; follow the below steps to create a group for the web portal and later try to add the Portal.

Step 1: If there is no existing group, add a group under **Web Portals -> Groups** and then fill in the details of the Cpanel group.

The screenshot displays the Ezeelogin Web Portal Groups management interface. The left sidebar shows the navigation menu with 'Web Portals' and 'Groups' highlighted. The main content area shows a table of existing groups. Below the table, the 'Add' form is visible, with fields for 'Name' and 'Description' pre-filled with 'CPanel' and 'Cpanel Group' respectively. The 'Cancel' and 'Save' buttons are at the bottom of the form.

Name	Description	Actions
+ cwp panel	Panels	
+ Employee_Production_portals	Testen	

Add

Name: CPanel

Description: Cpanel Group

Cancel Save

Step 2: Add Cpanel under **Web Portals**.

- Refer below screenshot to access without **Auto Login**(Disable autologin and Save it).

The screenshot shows the Ezeelogin web interface. On the left is a sidebar menu with options: Servers, Web Portals (selected), Groups, Import, Export, Users, Access Control, Settings, and Cluster. The main area is titled 'Edit web portal'. It contains several fields: 'Name' (CWP Control Panel), 'Description' (web portal), 'Login URL' (http://demo1.control-webpanel.com:2030/login/index.php), 'Use Proxy' (unchecked), and 'Private Web Portal' (unchecked). There is an 'Auto Login' checkbox which is checked and highlighted with a green box. Below it is a 'Group' dropdown menu showing 'cwp panel'. At the bottom right are 'Cancel' and 'Save' buttons, with the 'Save' button highlighted by a green box.
