## How to add litespeed as webportal in gateway server for autologin?

---

**Overview:** This article describes how to add litespeed as webportal in gateway server with autologin.

---

[Webproxy, Webpanel, Webportal, Controlpanel](#)

To add LiteSpeed as web portal in gateway server for autologin, [install lightspeed](#) in a server.

**Step 1:** Follow the below steps to add LiteSpeed as a web portal for autologin.

Paste the login URL and then click on the **Fetch details** button. Then the details of the LiteSpeed automatically get fetched.

The screenshot shows the 'Edit web portal' configuration page in Ezeelogin. The left sidebar contains navigation options: Servers, Web Portals (with sub-options: Groups, Import, Export), Users, Access Control, Settings, Cluster, Command Guard, Account, Help, and License. The main content area is titled 'Edit web portal' and contains the following fields and options:

- Name:** litespeed
- Login URL:** https://192.168.56.216:7080/login.php
- Fetch details:** A red button.
- Host:** 192.168.56.216
- Port:** 7080
- Request URI:** /login.php
- Username:** [User icon]
- Username Field:** userid
- Username Field Selector:** [Empty field]
- Submit Button Selector:** [Empty field]
- Extra Variables:** [Empty field]
- Private Web Portal:** [Unchecked checkbox]
- Description:** [Empty field]
- Use Proxy:** [Checked checkbox]
- Protocol:** HTTPS (Note: HTTPS is highly recommended.)
- Request Method:** POST
- Auth Type: Basic:** [Checked checkbox]
- Password:** [User icon]
- Password Field:** pass
- Password Field Selector:** [Empty field]
- Group:** portals
- Proxy Follow Redirects:** [Unchecked checkbox]
- Verify SSL:** [Unchecked checkbox]

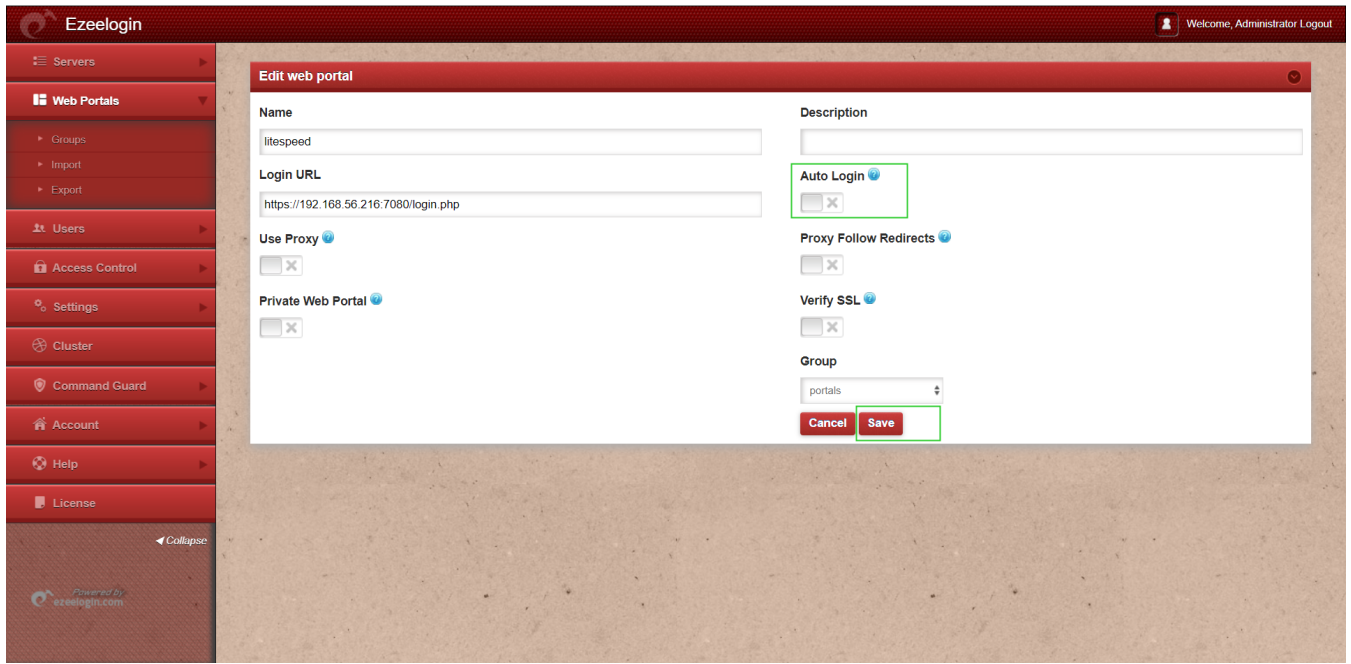

At the bottom right, there are 'Cancel' and 'Save' buttons.

Fill in the other details such as username filed selector and password filed selector. Then **save** it.

**Step 2:** For Litespeed autologin to work, enable **Use proxy**.
