

Configure SMTP on Ezeelogin Jump server

542 Manu Chacko October 18, 2022 [Tweaks & Configuration](#) 1762

How to configure SMTP relay with Sendmail?

Install Sendmail

Ubuntu / Debian systems

Centos/RHEL

1. Create Authentication file.

Create a directory in /etc/mail directory

2. Create an authentication file and add the following. Replace the following email with your mail credentials.

4. Restart the mail server

Now send a test email
