An error occurred while trying to submit the form [error: Internal Server Error]

Error: An error occurred while trying to submit the form (error: Internal Server Error)

In case you have encountered the above error **while** [adding a new server](#).

This could mainly occur due to:

1. Session Timeout.

 So just try to re-login then try adding the server again.

 If the error still persists.

2. Check the application log to get a detailed error log after adding a log_level trace to the ez.conf file.
