

KEX and Host Key Algorithms in SSH

565 Nesvin KN May 24, 2023 [General](#) 17850

What are KEX and Host Key Algorithms?

KEX is the short form of **Key Exchange**: The algorithm is chosen to compute the secret encryption key. Examples would be `diffie-hellman-group-exchange-sha1` and modern `'ecdh-sha2-nistp512'`.

Public_key or Server Host key: The asymmetric encryption algorithm used in the server's private-public host key pair. Examples would be `'ssh-rsa'` and elliptic curve `'ecdsa-sha2-nistp521'`.

How to find the KEX (Key Exchange) and Host Key Algorithms in SSH?

1. SSH from one linux machine to another in verbose mode to get the detailed process.

2. **KEX** and host key algorithms used to SSH can be found in debug 1 level logs. Refer below example of **KEX** and host key algorithms.

```

debug2: languages stoc:
debug2: first_kex_follows 0
debug2: reserved 0
debug2: peer server KEXINIT proposal
debug2: KEX algorithms: curve25519-sha256,curve25519-sha256@libssh.org,ecdh-sha2-nistp256,ecdh-sha2-nistp384,ecdh-sha2-nistp521,diffie-hellman-group-exchange-sha256,diffie-hellman-group16-sha512,diffie-hellman-group18-sha512,diffie-hellman-group-exchange-sha1,diffie-hellman-group14-sha256,diffie-hellman-group14-sha1,diffie-hellman-group1-sha1
debug2: host key algorithms: ssh-rsa,rsa-sha2-512,rsa-sha2-256,ecdsa-sha2-nistp256,ssh-ed25519

debug3: record hostkey: found key type ECDSA in file /root/.ssh/known_hosts:1
debug3: load hostkeys: loaded 1 keys from 192.168.1.7

```

How to change the KEX and host key algorithm on the server

machine?

1. Edit `sshd_config` file and append the below lines with **KexAlgorithms** and **HostKeyAlgorithms**.

2. Restart `sshd` service to affect the changes made in `sshd_config`.

3. **SSH** from the client machine to the server machine to view the changed **KEX** and **host key algorithms**.

```

debug2: compression stoc: none,zlib@openssh.com,zlib
