How to get the Shell Activity of Users

How to get the Shell Activity of Users.

It is the SSH gateway activity log that stores the details of all the ezeelogin users accessing the ezeelogin shell.
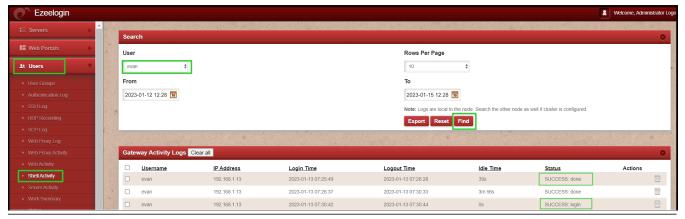

1. How to find the shell activity of users.

Select Users > Shell Activity > Select the user > Choose the date and time from the calendar > and FIND

   The server activity logs contain details of gateway server access by the ezeelogin user.

- <u>User:</u> Specify the user name whose logs have to be searched
- <u>To Rows per Page:</u> Number of rows of results to be displayed per page
- <u>From</u>: Select the start date & time
- <u>To</u>: Select the end date & time.

   You will find the gateway User logs accordingly:

- **SUCCESS: login** - The user is active in an ezeelogin shell.
- **SUCCESS: done** - The user is not-active/has been logged out from the ezeelogin shell.

2. How to know that the **user is still *active* on the shell**?

When the ezeelogin users access the ezeelogin ssh gateway server; the status will reflect as SUCCESS: login. Which in turn shows that the user is active on an ezeelogin shell.

To know the time the user has been on a particular server, you need to deduct the value from the logout and login time of each user.
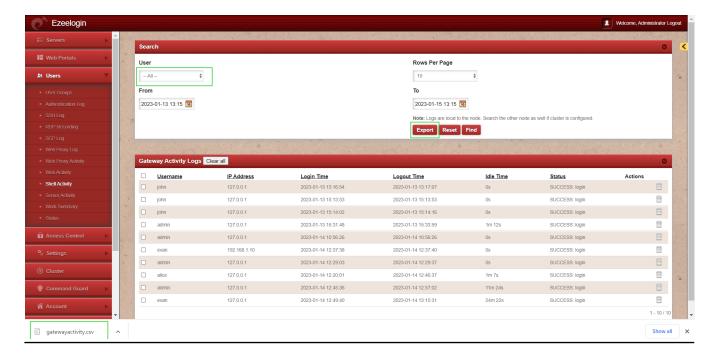

Note: You need to exit while logging off the user session then only the status will reflect as **SUCCESS: done**

In case, the user directly closes the session it will just show **SUCCESS: login** as an active user.

	Username	IP Address	Login Time	Logout Time	Idle Time	Status	Actions
☐	evan	192.168.1.13	2023-01-13 07:25:49	2023-01-13 07:26:28	39s	SUCCESS: done	🗑
☐	evan	192.168.1.13	2023-01-13 07:26:37	2023-01-13 07:30:33	3m 56s	SUCCESS: done	🗑
☐	evan	192.168.1.13	2023-01-13 07:30:42	2023-01-13 07:30:44	0s	SUCCESS: login	🗑

Gateway Activity Logs Clear all

3. Can we *export* the user logs?

You can download all the logs of the users in .csv format by clicking on export.
