

Adding Webuzo as ControlPanel in Ezeelogin

592 Arya March 3, 2023 [Features & Functionalities](#) 889

Adding Webuzo as ControlPanel in Ezeelogin UI

1.Login to Ezeelogin Software GUI-- > Settings--> Control Panel. Then add control panel. Refer the screenshot below as an example to configure Webuzo.

The screenshot shows the Ezeelogin software interface. On the left is a red sidebar menu with options: Servers, Web Portals, Users, Access Control, Settings (expanded), Control Panels (highlighted with a green box), Data Centers, API, LDAP, SAML, RADIUS, Server Fields, Cluster, Command Guard, Account, Help, and License. The main area displays the 'Add Control Panel' form. The form has two columns. The left column contains fields for Name (webuzo), Port (2005), Request URI (/index.php?act=login), Username Field (username), and Password Field (password). The right column contains fields for Description (Webuzo ControlPanel), Protocol (HTTPS), Request Method (POST), Username (root), Extra Variables (login=Login), and Auth Type (Basic). At the bottom right are 'Cancel' and 'Save' buttons. A note states: 'Note: HTTPS is highly recommended.'

2. Go to the Servers tab and select the control panel Webuzo as shown below:

Ezeelogin

Save

Make sure to select the control panel as Webuzo from the drop-down menu.

3. Also ensure that you have provided Control Panel User, Control Panel Password, and Control Panel Host under Advanced section if the control panel is not on this server but on a different Host . You can refer to the screenshot below as an example:

Use DNS

No

Note: Select No for USE DNS and CP USE DNS.

Login to Ezeelogin Software GUI-->Server -->Under undanced section you can change Use DNS and CP Use DNS

The screenshot shows the Ezeelogin GUI configuration page. The left sidebar contains a 'Servers' menu with options like Server Groups, Super Groups, Sub SSH Users, etc. The main content area has two columns of configuration fields. In the right column, the 'Use DNS' and 'CP Use DNS' dropdown menus are highlighted with a green box, both showing 'No' as the selected value. Other fields include Control Panel Host, Switch User Password, First Prompt, Privilege Escalation, Tunnel Host, Remote Console User, On Host, Rack ID, Comments, Switch User, Password Prompt, Root Prompt, Remote Console Host, Remote Console Password, Host Node, Machine ID, and Ignore Sub SSH User.

4.Click on the control panel icon for accessing Webuzo.

The screenshot shows the Ezeelogin GUI's 'Servers' list. A table displays the following data:

Name	IP Address	Server Group	SSH Port	Description	Actions
+ webuzo.eznoc.com	192.168.1.56	test	22		[Control Panel Icon]

A green arrow points to the control panel icon in the 'Actions' column for the 'webuzo.eznoc.com' server. The table also includes search filters and a 'Rows' dropdown set to 'Auto'.
