

# Integrate Azure AD in Ezeelogin jump server

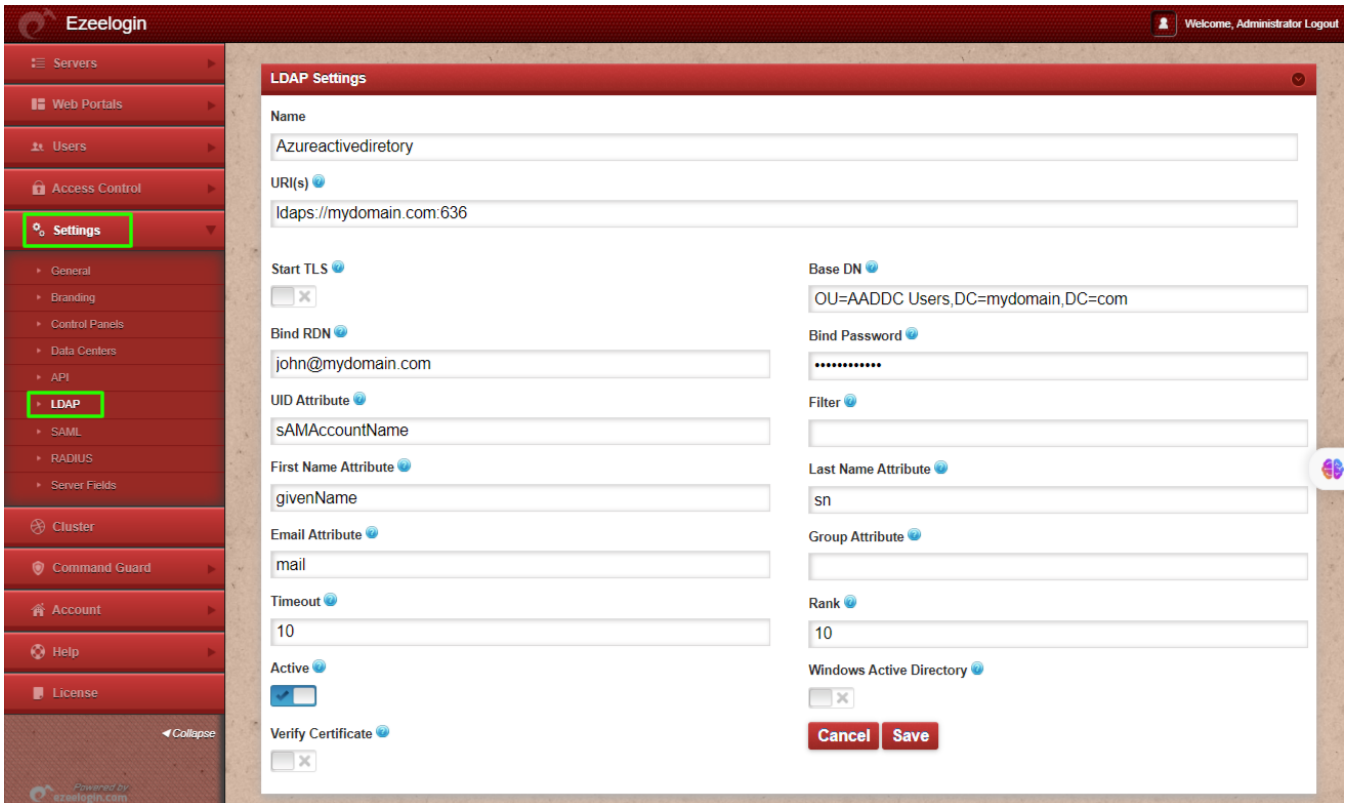

628 Manu Chacko August 17, 2023 [Tweaks & Configuration](#) 991

How to Integrate Azure Active Directory Domain Service in Ezeelogin jump server with LDAPS

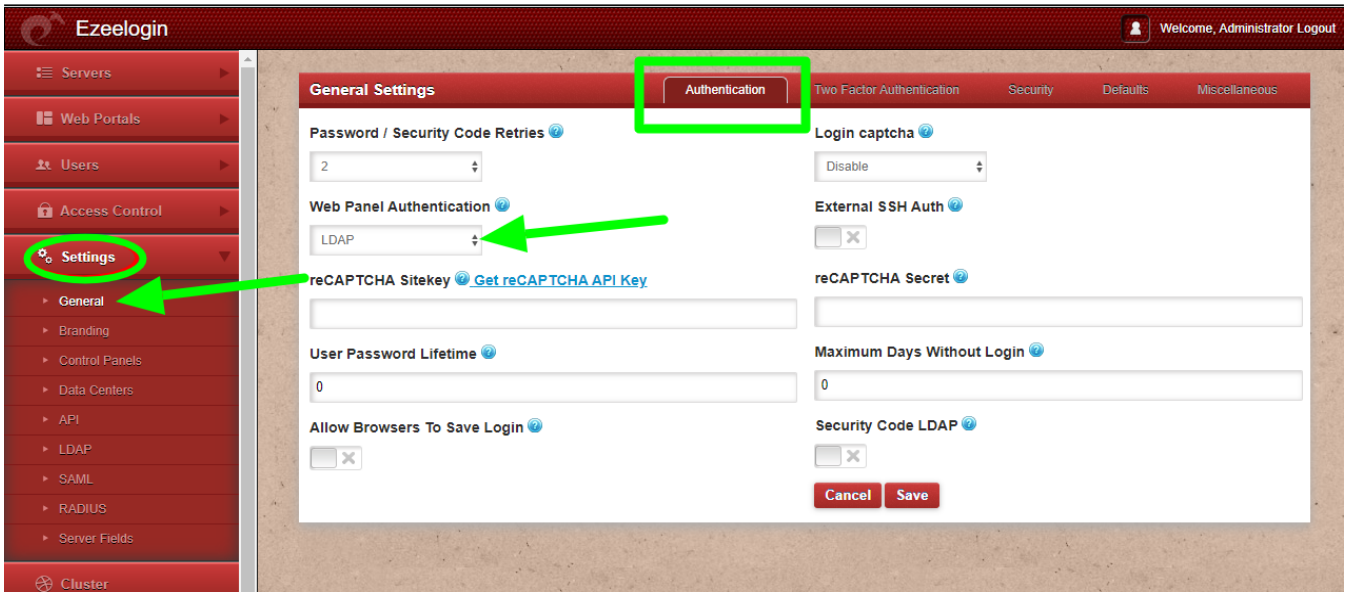

Refer to the article to [Enable LDAPS on Azure AD and integrate it into your application](#)

1 . *Login to Ezeelogin Web-GUI > open settings > Ldap*

Add the details of LDAP configurations as follows

2. Go to **Settings > General > Authentication > change Web Panel Authentication to LDAP**

3. Open **Settings** > **General settings** > **Security** > Check **Auto Create User**

Ezeelogin Welcome, Administrator Logout

  - LDAP
  - SAML
  - RADIUS
  - Server Fields

**General Settings** | Authentication | Two Factor Authentication | **Security** | Defaults | Miscellaneous

<b>Password Minimum Length</b> ⓘ <input type="text" value="20"/>	<b>Password Maximum Length</b> ⓘ <input type="text" value="32"/>
<b>Password Minimum Block Letters</b> ⓘ <input type="text" value="1"/>	<b>Password Minimum Small Letters</b> ⓘ <input type="text" value="1"/>
<b>Password Minimum Special Characters</b> ⓘ <input type="text" value="1"/>	<b>Password Minimum Digits</b> ⓘ <input type="text" value="1"/>
<b>Auto Create User</b> ⓘ <input checked="" type="checkbox"/>	<b>Command Guard</b> ⓘ <input type="text" value="Disable"/>
<b>Automated Password Change</b> ⓘ <input type="checkbox"/>	<b>Shell Access Notification</b> ⓘ <input type="checkbox"/>
<b>SSH Session Logging</b> ⓘ <input type="text" value="Output"/>	<b>Encrypt SSH Session Logs</b> ⓘ <input type="checkbox"/>

*Note: A green box highlights the 'Security' tab in the top navigation and the 'Settings' menu item in the left sidebar. A green arrow points to the 'Auto Create User' checkbox.*

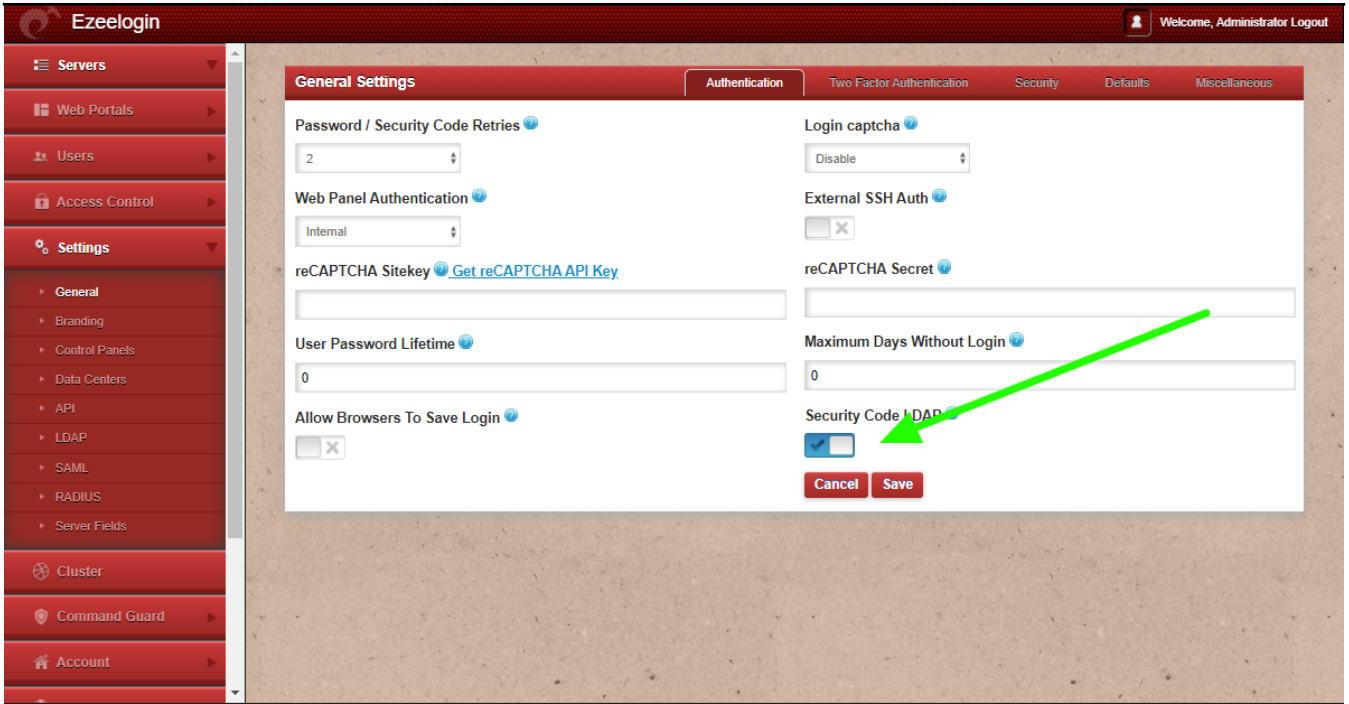

4. Select the **LDAP users** and click on the button to import users into Ezeelogin

You can confirm the imported LDAP users were listed in the Users tab in Ezeelogin GUI. You will be able to log in to Ezeelogin GUI with Azure AD user credentials.

After importing the users to Ezeelogin, log in with the user and set up the security code for the user under **Account > Password > New Security Code**.

4. Enable **Security Code LDAP** option from **Settings > General > Authentication**, if the user **does not** want to login to Ezeelogin GUI to **set up a security code**.
