How to view users in a specific user group?

You can utilize the search button to display members belonging to a particular user group.

Choose **User Group** from the **dropdown** menu and enter the specific **user group's name** to locate members belonging to that particular user group.

You can also generate [user reports](#) as csv files to view users in a specific user group. Run the below command after generating the user report

```
root@gateway-server:~# cat filename.csv | grep -i 'usergroup_name' | awk -F ',' '{print $1}' | sort | uniq
```

Replace "**filename**" with the name of your generated CSV file and "**usergroup_name**" with the specific user group.

For example

```
root@gateway-server:~# cat GroupAdmins.csv | grep -i 'Admins' | awk -F ',' '{print $1}' | sort | uniq
```

The above command will help you identify all the members who belong to the user group 'Admins' within your generated user report which is named **GroupAdmins.csv**.
