

Prompt ssh gateway user to enter reason for ssh access

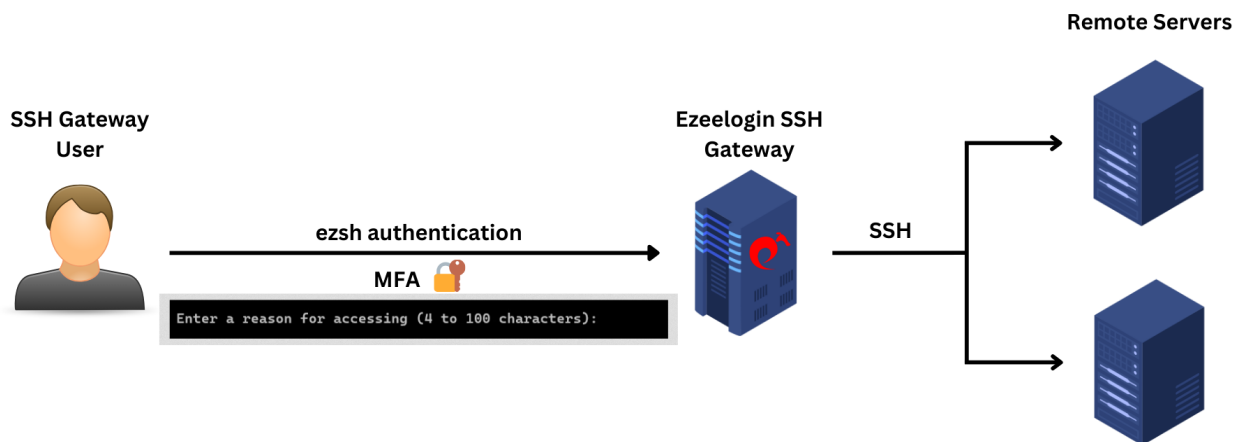

656 Nesvin KN January 29, 2024 [Security Features](#) 937

How to prompt a ssh gateway user to enter a 'reason' in ezsh shell and when ssh'ing to the remote server?

This feature will let the gateway user enter a 'reason' while entering the Ezeelogin shell and (ezsh) and the remote server. The 'reason typed in' will be stored in server activity and shell activity logs. This feature is useful for meeting security compliance requirements.

This feature is available from **Ezeelogin version 7.37.0**. [How to upgrade the Ezeelogin version to the latest?](#)

How to prompt the ssh gateway user to key in the 'reason' during SSH access?

1. Edit the gateway user and enable "**Prompt Reason.**" When the user SSH to ezsh, after the two-factor authentication step, the **shell will prompt them to enter a reason for the SSH connection**, which can be found under **shell activity**.

How to enable the prompt reason for entering to remote server?

1. Enable **Remote Access Reason** to globally enable prompt reason when entering all remote servers. Navigate to **Settings -> General -> Security -> enable Remote Access Reason**.

2. Navigate to **Users -> Server Activity -> Select username -> Find**. The reason and other details can

be found in the logs.

The screenshot shows the Ezeelogin web interface. On the left is a navigation menu with 'Users' highlighted. The main content area has a search bar with 'ezadmin' entered. Below the search bar is a table of 'Server Activity Logs'. The table has columns for Username, Server Name, Status, Reason, IP Address, Login Time, Logout Time, Input Idle Time, Output Idle Time, and Actions. Two rows are visible: one for 'ezadmin' with status 'SUCCESS: done' and reason 'check logs', and another for 'ezadmin' with status 'FAILED'. A green arrow points to the 'Reason' column header.
